#### EXPLANATORY NOTE

Climate change is no longer just a mere political issue. It has already evolved into a moral issue for us. As we have experienced the worsening effects of climate change over the past years, it has now become our collective moral obligation to ensure that we take actions to somehow address this issue. Although we may be a considerably small nation who can only have so much contribution in resolving the global issue of climate change, this does not excuse us from not doing whatever we can to help combat this humanitarian concern.

One of the worst aspects of our environmental policy is our lack of effort in improving our solid waste management programs. To address such issue, we enacted the “Ecological Solid Waste Management Act of 2000”. We are now 16 years into the implementation of the law, and we feel it is necessary to update the penal provisions of such law in order to effectively deter violations of such law. This bill, a re-filing of House Bill No. 2714 filed by Rep. Evelina G. Escudero last 16<sup>th</sup> Congress, advances our collective right to a balanced and healthful ecology in accord with the rhythm and harmony of nature. Furthermore, it is about time that we put into law, a concrete and definite program to ensure an effective waste management program. Local governments have done this through different ordinances. There is no reason we should not adopt similar, or even better programs, for the entire nation.
