Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City

EIGHTEENTH CONGRESS
First Regular Session
House Bill No. 38

Introduced by HON. ROZZANO RUFINO B. BIAZON

EXPLANATORY NOTE

This bill seeks to mandate the National Telecommunications Commission (NTC) to require Internet service providers (ISPs) to deliver minimum Internet connection speeds of 10 megabytes per second (mbps) for all mobile, fixed and fixed wireless broadband/internet access to their subscribers. Furthermore, ISPs shall guarantee that they continuously develop their system and work towards providing an average Internet connection speed above global average.

In this advanced technological world we live in today, the Internet undoubtedly has made a strong influence in almost all facets of our lives. It has become very essential in our daily living that even the United Nations General Assembly recognized access to the Internet as a basic human right.

By making access to information and communication far easier with only a click or a tap, the Internet plays an integral role in various fields like education, commerce, health, research, even politics and government. Its application is virtually limitless, hence, is considered a valuable resource.

With all its amazing functions however, high-speed access to the Internet is necessary to prove its true value and maximize its full potential as a tool in development. In this aspect, speed is the name of the game.

The Philippines is way behind its neighbors in Asia in Internet speed where some of the fastest Internet speeds in the world are found. Singapore, for example, has an average Internet download speed of 133.1 megabytes per second (mbps) compared to the Philippines' dismal 3.7 mbps. That's even putting it generously. Some reports even peg our country's Internet download speed at 2.5 mbps making us the country with the slowest Internet connection in the ASEAN.

While efforts have been made by the NTC to speed up the country's Internet connection by signing a memorandum setting the minimum broadband speed at 256 kbps and
mandated service providers to disclose to the public their average data rates per location, such action is clearly and grossly inadequate to help solve the problem.

Considering the astronomical rates the ISPs are charging the Filipino people, it is but just and fair to demand fast, quality and reliable Internet service from such companies. It is high time that consumers get real value for their money.

In view of the foregoing, immediate approval of this bill is earnestly sought.

ROZZANO RUFINO B. BIAZON

HOUSE OF REPRESENTATIVES  
Quezon City  

EIGHTEENTH CONGRESS  
First Regular Session  
House Bill No. 38  

Introduced by: HON. ROZZANO RUFINO B. BIAZON  

AN ACT  
MANDATING THE NATIONAL TELECOMMUNICATIONS COMMISSION TO REQUIRE INTERNET SERVICE PROVIDERS TO DELIVER A MINIMUM STANDARD OF 10 MEGABYTES PER SECOND (10MBPS) FOR INTERNET CONNECTION SPEED  

Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:  

Section 1. Short Title. – This Act shall be known as the "Faster Internet Services Act".  

Sec. 2. Declaration of Policy. - The State recognizes the vital role of communication and information in nation building as stated in Article II, Section 24, of the Constitution and as such, it shall employ actions to provide better and faster communication channels suitable to the needs and objectives of the nation. The State recognizes the important role of the Internet in almost every aspect of life today and thus, the State ensures that internet users and subscribers be accorded the best quality and reliability of internet connection service provided by the accredited Internet Service Providers in the country.  

Sec. 3. Definition of Terms. – For the purpose of this Act, the term:  

a. Bandwidth refers to the data transfer rate or the amount of data that can be carried from one point to another in a given time period and is usually expressed in bits per second (bps) or multiples of it;  

b. Broadband refers to a transmission medium which enables high-speed Internet access transmitted through various technologies such as the Digital Subscriber Line (DSL), Cable Modem, Fiber Optics, Wireless, Satellite, Worldwide Interoperability for Microwave Access (WiMax), and White Space;
c. Internet Service Providers or ISPs refer to commercial entities with a nationwide franchise that enable users to access Internet content and services. It may also refer to a public telecommunications entity offering a value-added service such as the internet; and

d. Public Telecommunications Entity or PTE refers to any person, firm, partnership or corporation, government or private, engaged in the provision of telecommunications services to the public for a fee.

Sec. 4. Role of the National Telecommunications Commission (NTC) – The National Telecommunications Commission is hereby mandated to require all ISPs to provide a minimum internet download speed of 10 Mbps for all broadband internet access be it mobile, fixed or fixed wireless. In order to meet the prescribed minimum standards, ISPs or PTEs shall modify, improve, or change telecommunication lines and systems or expand their infrastructure to run on higher capacity bandwidths based on the number of subscribers demanding for their services.

Sec. 5. Regulation. – The NTC shall, by regulation, establish requirements as deemed appropriate to ensure that ISPs meet the minimum standards in internet connection speed, and provide for parameters regarding connection, reception, just pricing, and billing practices to promote and protect the rights of consumers of internet services.

Sec. 6. Authority to Adjust the Minimum Standard. – The NTC is hereby mandated to conduct a periodic review of the implementation of this Act and, if necessary, adjust the minimum standard to provide consumers an average internet connection speed equal to, or above what is prevalent among Asian countries or the global average.

Sec. 7. Penalties. – Any ISP who shall not meet the minimum standards mentioned under Section 4 hereof or the regulations promulgated hereunder, shall be subject to the penalty of a fine of Five million pesos (P5,000,000.00).

Sec. 8. Implementing Rules and Regulations. – The NTC shall promulgate the necessary rules and regulations for the effective implementation of the provisions of this Act.

Sec. 9. Separability Clause. – If any provision of this Act is declared unconstitutional or invalid, other parts or provisions hereof not affected thereby shall continue to be in full force and effect.

Sec. 10. Repealing Clause. – All laws, orders, issuances, circulars, rules and regulations or parts thereof, which are inconsistent with the provisions of this Act are hereby repealed or modified accordingly.

Sec. 11. Effectivity. – This Act shall take effect fifteen (15) days after its publication in the Official Gazette or in at least two (2) newspapers of general circulation.

Approved,
