 Introduced by: Rep. PRESLEY C. DE JESUS (PHILRECA Partylist)

AN ACT AMENDING REPUBLIC ACT NO. 9136, OTHERWISE KNOWN AS THE "ELECTRIC POWER INDUSTRY REFORM ACT OF 2001 OR EPIRA", AND FOR OTHER PURPOSES

EXPLANATORY NOTE

This legislative measure is a collation of various proposals from the stakeholders in the power industry. It is admitted that putting all those into one final piece of a proposed bill is not a walk in the park. The proposals collected vary to an extent in terms of ways in pursuing reforms.

The outpour of citizens' action will re-direct the energies of the members in literally dismantling the law which may negate the milestones; however few, EPIRA has achieved. It is therefore a requirement that the leadership of Congress must, once it decides to hear the various proposals, identify specific provisions which should not put instability to the current investment on additional power supply, if the problem indeed is simply on supply unavailability. It is therefore indispensable to contemplate on Congress's collective action to pin down on the solutions "without burning the house".

In particular, this bill features the following:

- Retain state ownership of Agus-Pulangui Hydroelectric plants complexes to ensure stability of power supply and thereby avert power crises in Mindanao grid;
- Create the Mindanao Power Corporation to manage and operate the Agus and Pulangui Hydro Electric Power Plants;
- Optimize the powers and functions of the DOLE to protect the electric consumers against market abuse;
- Rationalize application of the wholesale Electricity spot market to achieve the objective of stabilizing power supply and maximum utilization thereof, at least cost manner;
• Authorize the government, through the National Power Corporation, to engage in power generation and contracting capacity undertaking as supplementary to stabilize market prices during emergency shutdown of base load plants;
• Transfer of small power utilities group (SPUG) operation to the National Electrification Administration (NEA)
• Ensure true market competition by enhancing safeguards on ownership limitation and restrictions;
• Simplify the distribution of the shares of national wealth tax, the communities hosting any source of energy are entitled for eighty percent (80%), with the provision that the generation facilities deduct the same amount from the generation charges imposed to electric consumers;
• Enhance the selection process for the heads of agencies in the power sector; and
• Expand the use of the universal charge through funding the rehabilitation of lines previously constructed using subsidy funds from NEA and/or Priority Development Assistant fund (PDAF) to electricity far-flung areas.

The passage of the bill is earnestly sought.
