EXPLANATORY NOTE

"The President may contract or guarantee foreign loans on behalf of the Republic of the Philippines with the prior concurrence of the Monetary Board, and subject to such limitations as may be provided by law. The Monetary Board shall, within thirty days from the end of every quarter of the calendar year, submit to the Congress a complete report of its decision on applications for loans to be contracted or guaranteed by the Government or government-owned and controlled corporations which would have the effect of increasing the foreign debt, and containing other matters as may be provided by law.” (Article VII, Section 20)

"Subject to reasonable conditions prescribed by law, the State adopts and implements a policy of full public disclosure of all its transactions involving public interest.” (Article II, Section 28)

"Foreign loans may only be incurred in accordance with law and the regulation of the monetary authority. Information on foreign loans obtained or guaranteed by the Government shall be made available to the public.” (Article XII, Section 21)

The 1987 Constitution, while authorizing the executive department through the President to contract foreign loans on behalf of the Republic, is rich with provisions seeking to protect the country’s interests against possible abuses. Be that as it may, there is still a need to pass legislation which shall centralize the myriad of functions and responsibilities distributed among various agencies concerning foreign loans from negotiation to debt servicing to one single agency. In this manner, the State will have a clearer picture of its indebtedness procedures and stature.

This new Cabinet level agency, composed of a board as its highest policy-making body, shall be the primary agency of the government that will integrate and coordinate the country’s debt management system that includes debt recording and inventory, debt monitoring and analysis, risk management, debt planning, debt service payments; advise on debt negotiations and borrowings, and formulation of debt policies and strategies.

In view of the foregoing, immediate passage of this bill is earnestly sought.
