EXPLANATORY NOTE

Article II, Section 28 of the 1987 Constitution declares that subject to reasonable conditions prescribed by law, the State adopts and implements a policy of full disclosure of all its transactions involving public interest. In response to this, this bill seeks to provide for the creation of a single, searchable Internet website that retains and displays data and information on the local government units' annual revenues, expenditures, and total bonded indebtedness. With the supervision of the Department of Interior and Local Government and the assistance of the Department of Information and Communications Technology, the Municipal or City Treasurer shall design and develop a local government public finance website, and to maintain and operate the site, without charge, every fiscal year.

The bill, establishes an accessible, user-friendly source of information to track local revenues and expenditures and to gauge the local government units' past and present levels of bonded indebtedness. Furthermore, this legislation helps facilitate transparency and accountability in governance and in the bureaucracy, identifying waste, and eliminating abuse at the local level. It is hoped that this bill will empower local residents by reinforcing their right to follow the allocation and spending of their hard-earned taxes, and hold their local leaders responsible for every fiscal transaction in their behalf.

In view of the foregoing, approval of this measure is earnestly sought.
