EXPLANATORY NOTE

Central to the government's economic agenda is economic dynamism and competitiveness with increased investments, business opportunities, and job generation. But with competition posed by neighboring countries with lower production costs, especially in the export industry, the journey toward this goal will travel at a slow pace.

For instance, China has been edging its Asian neighbors in enticing foreign investors, particularly for their export industry, due to its increasing number and magnitude of economic zones with low production costs. In so doing, it has been displacing our own export industry thereby causing shrinking businesses and job losses. To gain back a steady footing in the export industry, we need to bring the battle to the countryside where there are lower costs of production and vast natural and human capital. To more effectively achieve this, we need to establish more economic zones in favorable geographic positions such as Surigao del Sur.

Surigao del Sur, being strategically situated along the boarder area, allowing for easy transit of goods, having sufficient road networks and sea and air transportation infrastructure, and being blessed with raw materials and human capital at varying levels of skills and trades, is surely a viable location for a special economic zone.

The proposed Surigao del Sur economic, mining zone and freeport will not only contribute to the development of their province, but also concomitantly contribute to regional and national development as the capital, technological, and knowledge spillovers of the ecozone will filter throughout the country thereby helping attain the government's agenda of economic dynamism and competitiveness.

In view of the foregoing, the passage of this measure is earnestly sought.
