AN ACT
PROMOTING CONSUMER PROTECTION AND FOSTERING COMPETITION IN THE TELECOMMUNICATIONS INDUSTRY BY MANDATING THE UNLOCKING OF MOBILE WIRELESS DEVICES

EXPLANATORY NOTE

Switching to another service provider for improved wireless services and better options is a consumer right which is impaired by public telecommunications entities when they lock mobile wireless devices to their respective networks. Such device locking makes it difficult for consumers to take advantage of competitive and better offers available in the market. Although there exist independent devices or services from third parties that unlock the mobile device, this process would normally void its warranty.

Locking does not only deprive consumers the easy movement – using the same device – from their current telecommunications service provider to the one that best fits their needs and preferences. It also limits competition between and among industry players who are able to reduce subscriber turnover by using device locking as a deterrent, or even an irritant, to subscribers from switching providers.

While the National Telecommunications Commission has mandated the unlocking of mobile phones and devices under Memorandum Circular 01-05-2019 dated May 31, 2019, its applicability is limited to (1) postpaid devices after having complied with the contract period contained in the
subscription agreements; and (2) prepaid devices after having complied with usage requirements or agreed terms and conditions.

This legislative proposal mandates the unlocking of mobile wireless devices within **definitive** six- and nine-month periods from the date of purchase of the device. Under this bill, the eligibility of such devices for unlocking does not depend on the imposition of different lock-in periods that unduly binds the consumer to the public telecommunications entity that no longer provides quality services.

It also mandates unlocking of subsidized units or those mobile wireless devices with accompanying subscription contracts before the lapse of the mandated nine-month period – on-demand and for a fixed and reasonable unlocking fee without voiding their warranties. This allows consumers to effectively have their devices officially unlocked at any time without having to resort to third parties for unlocking and risking possible warranty issues.

Furthermore, the bill requires every public telecommunications entity or retailer of mobile wireless devices to provide every consumer sufficient information on (1) official channels for unlocking mobile wireless devices without voiding their warranties; and (2) the manner, method or fee associated with the process of unlocking these devices.

Existing business services and products affected by the implementation of this Act are given six (6) months transitory period from the effectivity of the implementing rules and regulations to comply with its requirements.

This legislation will contribute to the evolution of a more dynamic marketplace in the telecommunications industry where consumer choice is dictated by quality, price, and best value for money. Its immediate approval is earnestly sought.
