EXPLANATORY NOTE

In spite of the previous adjustments in the salaries of government employees through Executive Order No. 201, their current income still fails to cope with the ever increasing costs of basic necessities, as reflected in the yearly increase in the consumer price index.

Therefore, it is high time that government employees be granted additional assistance to help alleviate the effects of rising cost of living due to inflation and in order for them to sustain a decent living. The State should always see to it that its workers are shielded at all times from the erratic economic conditions brought about by ever spiraling prices of basic goods and commodities in the country and in world market, and other related factors.

In order to enable even lowest paid government workers to cope with these contingencies, it is high time the State considers putting into place a special economic assistance in the form of a Cost of Living Allowance (COLA) for government employees on top of the other mandatory allowances they are currently receiving.

In view of the foregoing, the immediate approval of this bill is earnestly sought.
