Republic of the Philippines
HOUSE OF THE REPRESENTATIVES
Quezon City

EIGHTEENTH CONGRESS
First Regular Session

HOUSE BILL No. 1516

Introduced by REPRESENTATIVES ALFREDO A. GARBIN, Jr. and
ELIZALDY S. CO

EXPLANATORY NOTE

The passage of this bill seeks to address the nationwide problem of sanitation and waste dispersal by unifying and integrating agencies concerned in sanitation, and establishing institutional responsibility and capability for sustainable sanitation.

It responds to the mandate of the State to protect and promote the right to health of the people and instil health consciousness among them. The State is obliged to protect and advance the right of the people to a balanced and healthful ecology in accord with the rhythm and harmony of nature. (Sect 15 and 16, Article II: Declaration of Principles and State Policies). Furthermore, the State shall adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable cost. (Section 11, Article XIII: Social Justice and Human Rights, Health)

UN General Assembly adopted a resolution calling on states and international organizations to provide financial resources, build capacity and transfer technology, particularly to developing countries, in scaling up efforts to provide safe, clean, accessible and affordable drinking water and sanitation for all. The Philippines recognizes the United Nations declaration that sanitation is a fundamental human right and is essential to public health and human development. In addition, it acknowledges the responsibility of the state to declare sustainable sanitation as a national policy and program priority.

Although the Department of Health reports that the population has gained greater access in sanitation, there is still a need to aggressively resolve this sanitation problem. It remains to be a grave concern as clearly observed not only during calamities but also in a day-to-day basis. A significant percent of the population still practice open defecation and negligent waste disposal. Much of said wastes are desludged into bodies of water causing its pollution. A substantial percent of reported diseases and deaths of the Filipino population is attributed to water pollution, sanitation conditions, and hygiene practices.

The bill was filed in the 15th Congress but for lack of time, its progress was halted at the committee level. In light of all these circumstances, the swift passage of this bill is earnestly sought.

ALFREDO A. GARBIN, Jr. ELIZALDY S. CO
AN ACT
CREATING THE NATIONAL SANITATION COORDINATING COUNCIL THAT SHALL
PROVIDE FOR A NATIONWIDE PROGRAM AND MANAGEMENT OF
SUSTAINABLE SANITATION AND OTHER PURPOSES

Be it enacted by the Senate and House of Representatives of the Philippines in
Congress assembled:

SECTION 1. Title – This Act shall be known as the “National Sustainable Sanitation Act
of 2016”,
