Republic Act (RA) 10351 or the Sin Tax Reform was signed into law in December 2012. The law is a good governance measure with positive impact on both fiscal and public health. RA 10351 corrected the long-standing weaknesses of the tobacco and alcohol excise tax system and increased the rates to reduce the demand for these products. The Sin Tax Law also raised much needed revenues to fund the Universal Health Care (UHC) program of the government.

The Sin Tax Law has been an unqualified success in its health and revenue objectives. Since its implementation in 2013, the government collected ₱427.6 billion pesos in incremental revenues (CY 2013-2018), of which ₱132.8 billion or 31.1 percent is from alcohol. This has increased the budget of the Department of Health (DOH) as the incremental revenues derived from RA 10351 were largely earmarked for UHC. The DOH budget more than tripled from ₱53.2 billion in 2013 to ₱166.7 billion in 2018 or a growth of 213.2 percent. A large amount of the incremental revenues earmarked for health is allocated for expanded health services and premium subsidies for the health insurance of indigents and senior citizens not covered by the National Health Insurance Program. As a result, Philippine Health Insurance Corporation (PhilHealth) almost tripled the coverage of the poor and the near poor from 5.2 million in 2013 to 15.7 million indigents by the end of 2018.
However, with the passage of RA 11223 or the UHC Law, funding requirement increased substantially. The estimated funding for its first year of implementation alone costs P257 billion, and a total of P1.4 trillion from 2020 to 2024. The implementation of the UHC Law will be funded by the sin tax earmarked funds through the regular annual budget of the DOH and PhilHealth, Philippine Gaming Corporation (PAGCOR), Philippine Charity Sweepstakes Office (PCSO), and PhilHealth premium contributions. Of the P257 billion funding requirement for 2020, only P195 billion will be funded by these sources, incurring a funding gap of P62 billion.

In order to reduce this funding gap, Congress approved a bill increasing excise tax on tobacco products, and imposed new taxes on heated tobacco products (HTPs) and vapor products. The estimated revenue generated under the Congress-approved bill is P15.7 billion in 2020, and a total of P129.9 billion from 2020 to 2024. However, this amount is not enough to close the funding gap of the UHC Law.

This bill seeks to increase the tax on alcohol products, and HTPs and vapor products to provide additional funding source for the UHC Law in order to further reduce the funding gap. This additional funding will help sustain PhilHealth coverage for all Filipino families; improve accessibility, affordability, and quality of health care; and provide better outpatient benefit package, including check-up or consultation and medicines.

An equally important objective of the bill is to discourage excessive consumption of alcohol products especially among the youth. Excessive alcohol drinking leads to diseases like cirrhosis or liver damage and pancreatitis, among others. Moreover, alcohol drinking leads to behaviors like drunk driving and domestic violence. According to Online National Electronic Injury Surveillance System of the DOH, there were 3,213 vehicular accidents due to alcohol intoxication or 5.9 percent of the 54,177 transport or vehicular crash-related injury cases in 2018. This has more than doubled from 1,376 alcohol-related accidents in 2013. This reform seeks to bring us close to the DOH target of 10.0 percent reduction in harmful alcohol consumption.

The increase in excise tax rates on HTPs is in line with the definition of cigarettes under Republic Act (RA) No. 9211. Cigarettes are defined as any roll or tubular
construction, which contain tobacco or its derivatives, and intended to be burned or heated under ordinary conditions of use. Further, Section 147 of the 1997 Tax Code, as amended, defines cigarettes as rolls of finely cut leaf tobacco, or any substitute therefor, wrapped in paper or in any other material. Since HTPs are of roll or tubular construction that contain tobacco materials and several filter sections wrapped in paper intended to be heated, these products should be classified as cigarettes subject to the same excise tax rate.

The health impact and safety of using vapor products and whether it is an aid to cigarette smoking cessation have not yet received conclusive evidence. However, because of the established addictive effect of nicotine, we propose to increase the excise tax rates of vapor products to discourage consumption. To prevent the children and youth from consuming vapor products, variants with flavoring other than plain tobacco or plain menthol, are proposed to be prohibited.

Imposing higher excise taxes is still the most effective policy tool to affect prices to discourage consumption of sin products, in particular, among the youth and the poor who are the most sensitive to price changes.

In light of the foregoing, the passage of this bill is earnestly sought.
