EIGHTEENTH CONGRESS
First Regular Session

House Bill No. 1958

Introduced by MAGDALO Party-List Representative
HON. MANUEL DG. CABOCHAN III

EXPLANATORY NOTE

Being an agricultural country, it is sad to note that the Philippines' agriculture and fisheries sector are among those which have been most neglected. We still import most of our food requirements because we are unable to raise enough food for our people. As a result, there is very little investment in the agricultural and fisheries sectors. For every peso loan extended in the country, only a centavo goes to agriculture. To make matters worse, the Filipino farmers have grown old. At 67 years, they are older than all of their Asian counterparts and produce less than the Vietnamese, Thai, and Chinese farmers.

The current situation in the agriculture and fisheries sector has likewise affected our young graduates. More agriculture and fisheries graduates choose to concentrate on other fields. They would rather go to the cities or go abroad after four (4) years of college. But they cannot be blamed for this because aside from an educational system that promotes employment rather than entrepreneurship, they find little or no prospects in agriculture or fisheries.

Therefore, this bill aims to further strengthen the active participation of the Filipino youth in agricultural productivity by institutionalizing the Young Farmers Program (YFP). The YFP intends to equip the youth with the necessary technical and entrepreneurial skills, to provide them production and marketing support, and to aid them in capital formation with the hope that they may contribute to food security, generate employment in the countryside and energize the agri-fisheries sector to meet the challenges of globalization.

In view of the foregoing, the immediate passage of this bill is earnestly requested.
