HOUSE BILL NO. 2034

AN ACT AUTHORIZING THE SECRETARY OF HEALTH TO AWARD GRANTS FOR TRAINING AND SUPPORT SERVICES FOR ALZHEIMER’S PATIENTS AND THEIR FAMILIES

EXPLANATORY NOTE

Alzheimer’s is a progressive disease that destroys memory and other important mental functions. At first, someone with Alzheimer’s disease may notice mild confusion and difficulty in remembering things. Eventually, people afflicted with this disease may even forget important people in their lives and undergo dramatic personality changes. It is the common cause of dementia— a group of brain disorders that cause the loss of intellectual and social skills. In Alzheimer’s disease, the brain cells die, causing a steady decline in memory and mental function.

The purpose of this bill is to provide and improve treatment services for patients afflicted with this disease and expand training and support services for the respective families of the patients by allowing the Department of Health to give grants to public and private health care providers

In view thereof, the early passage of this proposed measure is highly recommended.
