INTRODUCED BY REPRESENTATIVE ALFRED VARGAS

EXPLANATORY NOTE

The World Health Organization has identified Diabetes as one of the four major non-communicable diseases that cause deaths worldwide. With 7.3 million people with diabetes, it is feared that the Philippines is becoming the “Diabetes hotspot” of the world. Worse, Filipinos diagnosed with diabetes are getting younger as children as young as five years old have been diagnosed with Type 2 Diabetes.

This Representation firmly believes that the increasing prevalence of Diabetes in the country can be reversed because Diabetes can be prevented through simple lifestyle measures. Furthermore, Diabetes is treatable, can be controlled and managed to prevent complications. This can be done by increasing access to diagnosis, self-management education, and affordable treatment.

This bill provides a holistic approach to preventing and beating diabetes. It seeks to establish the Philippine Center for Diabetes and Endocrinology which will ensure the provision of medical services and other intervention methods (education, research, etc.) to our countrymen who are afflicted with Diabetes.

Efforts to prevent and treat diabetes will be important in achieving the sustainable development goal to “ensure healthy lives and promote well-being for all at all ages.” Thus, the immediate passage of this bill is sought.

RFP. ALFRED VARGAS
Fifth District, Quezon City
AN ACT
ESTABLISHING THE PHILIPPINE CENTER FOR DIABETES AND ENDOCRINOLOGY
AND FOR OTHER PURPOSES

Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:
