AN ACT
TO DEFINE THE NATIONAL TAXES REVENUE BASE, ENHANCE THE
JUST SHARE FROM THE NATIONAL TAXES
OF LOCAL GOVERNMENT UNITS,
AND RENAME THE "INTERNAL REVENUE ALLOTMENT" (IRA) TO
"NATIONAL TAX ALLOTMENT" (NTA), AMENDING FOR THE PURPOSE
CERTAIN PROVISIONS OF REPUBLIC ACT NO. 7160, OTHERWISE
KNOWN AS THE LOCAL GOVERNMENT CODE OF 1991

EXPLANATORY NOTE

The 1987 Constitution upholds local autonomy as a basic state policy. In addition to the power to create their own sources of revenues (Article X, Section 5, Constitution), local government units (LGUs) are also guaranteed "a just share, as determined by law, in the national taxes which shall be automatically released to them".

Republic Act No. 7160, otherwise known as the Local Government Code of 1991 (LGC), provides a formula to determine the LGUs' just share in the national taxes. Under Section 284 thereof, Congress limited and fixed the percentage share of LGUs in national taxes only from the national "internal revenue" taxes instead of from "all national taxes" as ordained by the Constitution. Thus, the term "Internal Revenue Allotment" (IRA) was used

Page 1 of 6
Almost three decades since the LGC was passed, the LGUs’ share remains pegged at 40% of the national internal revenues collected during the third year prior to the current fiscal year. Although Section 521 of the LGC mandates a review of the LGUs’ share at least once every five (5) years, the formula for the determination of the IRA remained unchanged for the past 28 years.

The 40% IRA share is equivalent to an annual average of only 16% of the National Government’s annual budget, with the remaining 84% being spent by the National Government, inclusive of the debt service, in accordance with the appropriations law passed annually by Congress. This 16% share in the national budget is very low compared to the annual average share of subnational governments in Southeast Asia and the Asian region, which are 23% and 34%, respectively.

This 16% annual average share is apportioned annually to all LGUs throughout the country which are comprised of 81 provinces, 145 cities, 1,478 municipalities and 41,102 barangays, in accordance with the fixed formula provided under Sections 284 and 285 of the Code. As frontliners in the delivery of public services, this measly 16% share of the budget pie is not sufficient to meet the growing demands of the constituents of a huge majority of the LGUs.

From 2015 to 2017, the average IRA dependency rates of provinces, cities and municipalities were at 79%, 40% and 78%, respectively because the LGC provisions on the situs of taxation is highly advantageous only to a handful of Metro Cities to the detriment of 99% of the LGUs.

The 2017 Statement of Receipts and Expenditures of LGUs show that out of the total locally generated revenues, 67% goes to cities, 19% to municipalities and only 14% is collected by the provinces because they have lesser taxing powers. Only cities and municipalities can impose business taxes under the Code. Of all the cities’ total local revenues, 58% goes to Metro
Manila, and of this amount, 71% goes to the coffers of the top five Metro Cities namely Quezon City, Makati, Manila, Pasig and Taguig, where 86% of the head offices of local businesses, banks and financial institutions are located.

Thus, through the years, this lopsided local revenue-generating provisions of the Code further aggravated the widening gap or mismatch in revenues and expenditures of LGUs vis-à-vis the functions and responsibilities they are mandated to fulfil as frontline service providers, including those that are devolved to them. This impeded the delivery of goods and services in the countryside and consequently, exacerbated the worsening congestion problems in Metro Manila.

The current determination of the national taxes revenue base and the inaccurate computation of the IRA share of LGUs is, according to Supreme Court Chief Justice Bersamin, a “glaring contravention of our fundamental law”.

A study conducted by the League of Provinces of the Philippines (LPP) reveals that this resulted in a compounded IRA shortfall of about P1.5 Trillion covering FYs 1991-2019 attributable to the non-inclusion in the national tax revenue base of the following national taxes: (1) revenue collections of the Bureau of Customs (BOC) from VAT, documentary stamp taxes (DST), and excise taxes on imported goods, which accounts for about 74% of the IRA shortfalls; (2) taxes collected by ARMM and revenues from special funds such as tobacco, mining, franchises, ecozones, and deduction of the COA share, which accounts for about 18%; and (3) the remaining 8% of the IRA shortfalls due to other discrepancies between the computations of the BIR and DBM, and illegal deductions of the cost of devolved functions (CODEF) from the total IRA.

Thus, instead of the full 40% share mandated by law, LGUs are only actually receiving an average of about 30% of the collection of national taxes which is only 14% of the annual national budget (GAA).
As of FY 2019, the current actual IRA level is at P575 Billion or 15.7% of the P3.662 Trillion total annual budget as approved under R.A. 11260. The National Tax Research Commission (NTRC) estimates that the mandated full 40% level, based on the Supreme Court decision in the Mandanas and Garcia cases, should be P779 Billion which is equivalent to 21% share of the national budget for FY 2019. LPP estimates the full 40% to be higher at P799 Billion, or 21.8% share of the GAA.

This long-standing issue on the determination of the national taxes revenue base and the IRA was resolved by the Supreme Court when it decided with finality in favour of the joint petitions filed by Batangas Governor Hermilando “Dodo” Mandanas on January 9, 2012 (G.R. No. 199802), and subsequently on August 27, 2013 by the late Cong. Tet Garcia of the 2nd District of Bataan, duly represented by Bataan Gov. Abet Garcia (G.R. No. 208488). The Supreme Court ruled that the phrase “internal revenues” is unconstitutional and that the “Internal Revenue Allotment” (IRA) should, instead, be the “National Tax Allotment” of LGUs.

The Supreme Court, thus, ordered the National Government to prospectively include in the national tax revenue base, all the national revenue collections of the BIR, the Bureau of Customs (BOC), the ARMM and other non-BIR and non-BOC agencies, as well as the shares of the National Government from tobacco and mining taxes, special funds, special accounts, and all other national taxes, including the amounts earmarked
for the COA share so as to accurately determine the LGUs’ rightful share and faithfully implement Section 6 of Article X of the 1987 Constitution which provides that “LGUs shall have a just share, as determined by law, in the national taxes which shall be automatically released to them.”

Pursuant to the Supreme Court decision on the Mandanas and Garcia cases promulgated on May 22, 2019, this Bill, seeks to clearly define the national taxes revenue base for the accurate computation of the LGUs’ just share of national taxes and change the term “Internal Revenue Allotment” (IRA) to the LGUs’ “National Tax Allotment” (NaTA).

This measure also consolidates and synchronizes all other pertinent provisions of other relevant laws and implementing rules and regulations on the determination of the LGUs’ entitlements, particularly Republic Act No. 8424, otherwise known as the 1987 National Internal Revenue Code, as amended. It defines important terms and phrases being used and provides a more transparent procedure for its determination that guarantees the active participation of the LGUs (through their Leagues).

More importantly, the bill proposes enhancing or augmenting the LGUs’ share which not only increases their capabilities to deliver services to the grassroots but can also help them adequately prepare for a shift to a federal form of government should it be instituted by the Duterte administration.

In sum, this measure, proposed to be known as the LGUs’ NaTA Augmentation Bill, seeks to amend the pertinent provisions of the Local Government Code of 1991 on the guaranteed entitlements of the LGUs from all national taxes, as well as provide for a more equitable collection of locally generated revenues.

The approval of this measure will provide our LGUs the necessary additional resources that can better enable them to deliver needed basic services to the people, contribute more robustly to the country’s GDP, and
become more active partners of the national government in national development.

The increase in the LGUs' share from both the national and local revenues will lead to more robust LGUs. The more robust our LGUs are, the better for the overall development of the country.

Under the premises, approval of this bill is strongly recommended.

REP. ANTONIO T. ALBANO

HOUSE OF REPRESENTATIVES

EIGHTEENTH CONGRESS

All LGUs shall enjoy fiscal autonomy and their just share from all national taxes shall be automatically appropriated and automatically released directly to them without need of any further action of the local governments. The utilization of their just share from all national taxes shall be determined exclusively by the Local governments based on the needs and priorities of their constituents, as duly approved by their respective local councils or Sanggunian.
SEC. 2. Definition of Terms. - As used in this Act, the following terms are defined as follows:

(a) "Local Government Units (LGUs)" refers to the territorial and political subdivisions of the Republic of the Philippines comprising of all the provinces, cities, municipalities, and barangays, including the autonomous regions in Muslim Mindanao and the Cordilleras, as provided by law. The Metro Manila Development Authority (MMDA), created under RA 7924, is a special administrative region for the National Capital Region (NCR), not an LGU.

(b) "National Tax Allotment" or "NaTA", previously referred to as the "Internal Revenue Allotment (IRA), shall refer to the just share of LGUs from all national taxes or revenues actually realized or collected by the national government, including those collected by the Bureau of the Internal Revenue (BIR), Bureau of Customs (BOC), and other agencies or instrumentalities of the government. All terms in the Local Government Code (LGC) pertaining to the Internal Revenue Allotment (IRA) shall hereinafter be referred to as the LGUs' National Tax Allotment or NaTA. The NaTA shall be automatically appropriated by Congress and automatically released by the Bureau of Treasury directly to the LGUs and its determination shall be in accordance with Section 4 hereof.

(c) "National Tax Revenue Base" (NTRB) refers to the national tax revenue collections of the National Government, which shall be used as basis to determine the LGUs' NaTA. Consistent with the Supreme Court decision in G.R. No. 199802 and 208488 and in accordance with existing laws, the determination of the National Tax Revenue Base (NTRB) shall include, but shall not be limited to the following national taxes collected by the national government:

1. The National Internal Revenue Taxes (NIRTs) enumerated in Section 21 of RA No. 8424 as amended, otherwise known as the National Internal Revenue Code (NIRC), to include the value-added taxes (VATS), excise taxes, and documentary stamp taxes (DSTs) collected by the BIR and the BOC and all their deputized agents;

10. The amount earmarked as auditing fee of the Commission on Audit (COA) which, once determined, "shall not be deducted prior to the computation of the share of LGUs in the National Taxes" since earmarking is not the same as withholding (G.R. 148191). Section 24 (3) of PD 1445 and Sec. 284 of RA 8424 does not diminish the base amount of national taxes that LGUs are to share from and merely apportions "one-half of one percent (1/2% of 1%) of the collections from national internal revenue taxes not otherwise accruing to Special Funds or Special Accounts in the General Fund of the National Government".

Only the mandated share of host LGUs from these special funds or accounts shall be excluded from the computation of the LGUs’ NaTA, as these are intended by law to be entitlements of LGUs in addition to their respective shares from national taxes (SNT). It is up to the concerned LGUs how much amount or what percentage of the IRA due them should be set aside to cover the expenses to be incurred for such devolved functions and activities, as approved by their respective local councils in their annual budget.

SEC. 3. National Tax Allotment - The term "Internal Revenue Allotment" or IRA, shall henceforth be known as the local government units’ “National Tax Allotment” or NaTA since it covers not only the shares from internal revenues, but also shares from external revenues collected by the National Government.
