Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City, Metro Manila

EIGHTEENTH CONGRESS
First Regular Session

HOUSE BILL NO. 2620

Introduced by REPRESENTATIVES ANTONIO T. ALBANO and RODOLFO B. ALBANO

EXPLANATORY NOTE

In the past decade, Rehabilitation Medicine as a field of specialization experienced growth in all aspects. The number of trainees, graduates, and certified diplomats and fellows has increased tremendously. There has also been a markedly fast pace at which rehabilitation centers have sprouted throughout the country, all with the noble intent of delivering expert rehabilitative care to Filipinos suffering from neuromusculoskeletal, cardiovascular, pulmonary, and other system disorders.

However, many of these rehabilitation centers are not headed by physiatrists (medical specialists who trained a minimum of three (3) years in Rehabilitation Medicine) but by other medical and allied health professionals. By the nature of their training, physiatrists are in the best position to head rehabilitation centers and supervise the allied rehabilitative professionals: physical therapist, occupational therapists, speech therapist, orthotists, and prosthetists.
In the medical field, it is the physiatrist who is the specialist in medical rehabilitation and who is trained to evaluate and treat patients with physical disabilities from the rehabilitation standpoint, and to manage and administer Rehabilitation Medicine departments, centers, clinics or other similar facilities.

It is the objective of this proposed Rehabilitation Medicine Act to set standards for the training and practice of Rehabilitation Medicine as well as technical and operational standards for rehabilitation centers to enable them to function at the highest level of standards as headed and supervised by duly trained and certified physiatrists. This way, the interests of the Filipino patients who seek treatment from these centers are fully protected.

In view of the foregoing, immediate approval of this bill is earnestly sought.

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City, Metro Manila

EIGHTEENTH CONGRESS
First Regular Session

HOUSE BILL NO. 2620

Introduced by REPRESENTATIVES ANTONIO T. ALBANO and RODOLFO B. ALBANO

AN ACT
PROVIDING FOR STANDARDS FOR THE PRACTICE OF REHABILITATION MEDICINE AND FOR OTHER PURPOSES

Be in enacted by the Senate and House of Representatives of the Philippines in Congress assembled:

SECTION 1. Short Title. – This Act shall be known as the “Medical Rehabilitation Standards Act of 2019”

SEC. 2. Declaration of Policy. – It is the policy of the State to protect and promote the right to health of the people by making the delivery of expert rehabilitative care to Filipinos suffering from neuromusculoskeletal, cardiovascular, pulmonary and other system disorders which produce temporary or permanent disability accessible, effective and affordable. Toward this end, standards for the effective practice of Rehabilitation Medicine and for the establishment, management and operations of rehabilitation facilities are hereby established.

SEC. 3. – Definitions. – As used in this Act, the following terms shall mean:

a. Rehabilitation Medicine – the branch of medicine which deals with the prevention, diagnosis, treatment and rehabilitation of
neuromusculoskeletal, cardiovascular, pulmonary and other system disorders which produce temporary or permanent disability in patients as well as the performance of different diagnostic procedures, including, but not limited to, electromyography and other electrodiagnostic techniques. It also involves specialized medical care and training of patients with loss of any function so that they may obtain or be able to function to their maximum potential, physically, psychologically, socially and vocationally, providing special attention and care to prevent complications or deterioration, and to assist in physiologic adaptation of disability. In addition, the practice of Rehabilitation Medicine uses agents such as heat, light, water, electricity, therapeutic exercise and mechanical agents in its treatment armamentarium.

b. Medical Rehabilitation – the process of helping a person reach the fullest physical, psychological, social, vocational and educational potential consistent with his or her physiologic or anatomic impairments, environmental limitations and life plans.

c. Psychiatrist – a physician who is licensed and duly registered with the Professional Regulation Commission and who completed three (3) years of residency training in Rehabilitation Medicine in a Philippine Board Rehabilitation Medicine-accredited training institution.

d. Philippine Board of Rehabilitation Medicine (PBRM) – a non-stock, non-profit corporation, duly recognized by the Professional Regulation Commission and the Philippine Medical Association composed of Board Certified Rehabilitation Medicine Specialists tasked with accrediting and evaluating training institutions specializing in Rehabilitation Medicine, and certifying graduates of these training institutions.

e. Rehabilitation Medicine Practitioner/Psychiatrist – a licensed physician who completed a residency training program in Rehabilitation Medicine in a Philippine Board of Rehabilitation
Medicine (PBRM) accredited training institution. They shall be qualified by the PBRM as:

A) Board Eligible Physiatrist – refers to one who completed residency training in a PBRM-accredited residency training program but who has not successfully completed the specialty board examination.

B) Board Certified (Diplomate) – refers to those have passed Part I (written) and Part II (oral) of the Diplomate Board Examination given by the Philippine Board of Rehabilitation Medicine (PBRM).

f. Rehabilitation Medicine Center/Facility/Unit - any facility that renders services for the rehabilitation of physical disabilities and which may be hospital-based or free-standing.

g. Rehabilitation Medicine Team – a group of medical and allied health professionals concerned with the medical rehabilitation of patients with physical disabilities. The team is headed by a physiatrist and is composed of, but not limited to, the following:

1. Physical Therapists
2. Occupational Therapists
3. Prosthetists and Orthotists
4. Rehabilitation Nurses
5. Speech Pathologists
6. Social Workers
7. Vocational Counselors
8. Recreational Therapists

SEC. 4. Scope of Practice. – The practice of Rehabilitation Medicine includes:

a. Professional services related to the care of an individual patient, rendered either as a physician primarily responsible for individual patient care or as a consultant to another physician, and consists of:
1. History taking, examination of patients, performance of specific
diagnostic procedures for the purpose of establishing diagnosis
and evaluation of disability, impairment, functional capacity
and potential for rehabilitation;
2. Prescription and rendering of appropriate medical treatment
which may include any or all aspects of physical medicine as
well as rehabilitative measures, including but not limited to
physical therapy, occupational therapy, speech therapy and
orthotic and prosthetic services.
3. Follow-up examination of patients in offices, hospitals,
rehabilitation facilities, extended care facilities or home for
purposes of re-evaluation and treatment modifications;
4. Appropriate consultation with other medical specialists;
5. Counseling and conference with non-physician health care
professionals or family concerning conduct of patient’s care or
patient’s progress; and
6. Examination of patient’s records, preparation of reports,
designing, planning, and implementation of health programs for
the maintenance of health and prevention of disability; and
correspondence as well as appearance in court or providing
testimony pertaining to a patient.

b. Professional services related to the administration of rehabilitation
facilities or units consist of:
1. Professional general supervision of rehabilitation services in a
hospital-based rehabilitation center or unit or any other free
standing units that render limited rehabilitation services,
convalescent home and private homes, for quality assurance
and appropriate utilization of services;
2. Planning, establishment and management of facilities,
equipment and personnel for the performance of functions and
activities of a rehabilitation department or unit, or any other
free standing unit that render limited rehabilitation services,
convalescent home and private homes, for quality assurance
and appropriate utilization of services;
3. Maintenance of complete and accurate records and statistics;
4. Education of physicians and allied health care professionals in
Rehabilitation Medicine, both local and foreign, for programs
related to Rehabilitation Medicine;
5. Education of the public on health care issues pertaining to
Rehabilitation Medicine through research and medical
education;
6. Promoting professional development of Rehabilitation Medicine
through research and medical education;
7. Designing, planning and implementing of health programs for
maintenance of health and prevention of disability;
8. Establishing linkages with government and non-government
agencies, both local and foreign, for programs related to
Rehabilitation Medicine;
9. Promotion of the team approach among medical and allied
medical health care professionals in the holistic care of patients;
and
10. Setting standards for compensation of Rehabilitation
Medicine services.

c. Guidelines for Practice in a Rehabilitation Medicine Facility:
1. Every patient shall be examined and diagnosed by a physiatrist.
The physiatrist recommends, prescribes and supervises an
individual treatment plan. The treatment plan and rehabilitation
program shall be regularly reviewed on a team basis.
2. Medications and various other therapies shall be prescribed by
a physiatrist.
3. The physiatrist has the primary responsibility of regularly
following-up on patients in his charge and modifying or
terminating treatment.
4. A physiatrist shall head the facility/unit and shall supervise the
delivery of rehabilitation medicine services rendered by other
members of the Rehabilitation Medicine team. In areas where
there is no physiatrist, a licensed physician shall head the
facility unit.

5. If a physician is not competent to manage a patient, he shall
consult or refer to another physiatrist or physician who is
competent in the particular disease or condition requiring
treatment.

6. A Board certified physiatrist may head not more than three (3)
Rehabilitation Medicine facilities. In the absence of a Board
Certified physiatrist, a Board eligible physiatrist may head the
facility, provided that he conforms to the requirements of the
PBRM.

7. The physiatrist shall charge professional fees in accordance with
the standards of the Philippine Medical Association and the
Philippine Health Insurance System (PHILHEALTH).

8. The physiatrist shall conduct himself in a manner consistent
with the Code of Ethics of the Philippine Medical Association.

SEC. 5. Qualifications to Practice. – A physician who is a Board
Certified/Board Eligible physiatrist, of good moral character and is a
member of the Philippine Medical Association is qualified to practice
Rehabilitation Medicine.

SEC. 6. Accreditation and Certification. – This Act aims to establish
the standards for the practice of Rehabilitation Medicine and the
certification of Rehabilitation Medicine practitioners in order to ensure the
highest quality of professional rehabilitation service to the public and to the
medical community.

a. Accreditation of the Physiatrist
   1. A Rehabilitation Medicine Practitioner eligible for
      accreditation is a graduate of a Philippine Board of
Rehabilitation Medicine (PBRM) – accredited Rehabilitation Medicine training institution and certified by the PBRM as:

1.a Board certified (Diplomate)
1.b Board Eligible

2. A Rehabilitation Medicine Practitioner is duly recognized as PBRM Board Certified upon compliance with and submission of the following requirements:

2.a. Authenticated Professional Regulation Commission (PRC) ID as a duly registered physician.

2.b. Certificate of completion of training in a PBRM accredited Rehabilitation Medicine training institution.

2.c. Certificate from the Philippine Board of Rehabilitation Medicine (PBRM).

3. A Rehabilitation Medicine Practitioner is duly recognized as PBRM Board Eligible upon compliance with and submission of the following requirements:

3.a. Authenticated Professional Regulation Commission (PRC) ID as duly registered physician

3.b. Certificate of completion of training in a PBRM accredited Rehabilitation Medicine training institution.

3.c. Certificate of Eligibility from PBRM.

4. A Rehabilitation Medicine Practitioner, who is duly recognized as PBRM Board Eligible, must upgrade to a PBRM Board Certified status within five (5) years after graduation from a PBRM-accredited Rehabilitation Medicine training institution. Forfeiture of this Board eligibility status is incumbent upon review and evaluation of the PBRM Board of Governors.
b. Continuing Certification of Rehabilitation Medicine Specialists - A Certified Diplomate of the Philippine Board of Rehabilitation Medicine, in order to be duly recognized as a rehabilitation Medicine specialist, must undergo re-certification every three (3) years through PBRM accreditation.

**SEC. 7. - Technical Standards and Requirements for the Registration, Operation and Maintenance of Rehabilitation Medicine Facilities.** - Technical standards and requirements for the registration, operation and maintenance or rehabilitation medicine facilities shall apply to all entities performing the activities and functions of Rehabilitation Medicine facilities. These shall include the evaluation and treatment of all conditions requiring rehabilitation of physical disabilities. These standards and requirements shall be formulated to protect and promote the health of the people through the implementation of standards to ensure proper management and adequate support for Rehabilitation Medicine facilities.

**SEC. 8. Regulatory Authority** - technical standards and requirements for the registration and maintenance of Rehabilitation Medicine Facilities in the Philippines shall be implemented and regulated by the Department of Health-Bureau of Health Facilities and Services (DOH-BHFS).

**SEC. 9. Classification of Facilities** - Rehabilitation Medicine facilities shall be classified according to the institutional character, and extent of services offered. The bases for the classification of the different categories of Rehabilitation facilities are: (1) Physiatrist qualification, (2) Allied Health personnel staff qualification, (3) rehabilitation Medicine services available and (4) Physical set-up and equipment.

a. Categories

1. As to institutional character, Rehabilitation Medicine facilities are either hospital based (if operating within a hospital set-up) or free standing (if operating on its own or part of a facility other than a hospital).
2. As to the extent of services, Rehabilitation Medicine facilities may be primary, secondary, tertiary, or home-based.
3. As to function, a Rehabilitation Medicine facility may be utilized for training services and research or for services alone.
4. As to services, a rehabilitation Medicine facility can also be either general or specialized.

b. A primary rehabilitation Medicine facility shall have the following:
   1. At least one (1) PBRM eligible physiatrist;
   2. At least one (1) allied rehabilitation health professional;
   3. Rehabilitation Medicine consultation and management with physical therapy services;
   4. Physical set-up;
   5. Medical consultation area;
   6. Treatment area to include at least an electro therapy device and superficial heating modality, and ADFL training devices;
   7. Gym area, to include parallel bars, mirror, weights and assistive devices such as canes, crutches and walkers among others;
   8. Evaluation tools;
   9. Adequate utilities such as water, electricity and consumables; and
   10. First Aid kit with basic CPR equipment

c. A secondary Rehabilitation Medicine facility shall have the following:
   1. At least one (1) PBRM Board certified Physiatrist;
   2. At least one (1) licensed therapist and occupational therapist;
   3. Rehabilitation Medicine consultation and management, physical therapy and occupational therapy services; and
   4. Compliance with the primary category set-up plus deep heating modality, manual traction and therapeutic exercise equipment for the gym area.

d. A tertiary Rehabilitation Medicine facility shall have the following:
1. At least one (1) PBRM Board certified physiatrist;
2. At least one (1) licensed physical therapist and occupational therapist;
3. Rehabilitation Medicine consultation and management, physical, occupational therapy, prosthetist and orthotist in-house or referral services, speech therapy in-house or referral services;
4. Compliance with the secondary category set-up and equipments, with additional two (2) superficial healing modalities, medium frequency modality, mechanized traction, ultraviolet or cold laser intermittent compression unit, mechanized intermittent traction and tilt table with additional gym equipment.
5. A Training/Service and Research facility, which shall fulfill all the requirements as a residency training institution in accordance with PBRM guidelines.
6. A specialized facility which should cater to sub-specialty conditions in rehabilitation medicine including cardiac, pain, pediatric, pulmonary, sports, among others, shall be a hospital-based facility with a multi-disciplinary set-up.

SEC. 10. Management and Operation of a Rehabilitation Medicine Facility. — A Rehabilitation Medicine Facility shall be headed by a Rehabilitation Medicine specialist who is either a PBRM Certified or Eligible Rehabilitation Medicine specialist in the said facility. An adequate and effective system of documentation, recording and records keeping must be maintained for all consultations and services in the facility. The rates for consultation and services shall be in accordance with the standards of the Philippine Medical Association and PHILHEALTH.

SEC. 11. Application for Registration and Issuance of License. — Applications for registration and issuance of a license shall be filed by the owner of the facility or his duly authorized representative with the DOH-Bureau of Health Facilities and Services (DOH-BHFS), together with an
