EXPLANATORY NOTE

This bill was filed during the 15th Congress and was re-filed during the 16th Congress, where it was approved by the House of Representatives and transmitted to the Senate. It was again approved by the House of Representatives and transmitted to the Senate during the 17th Congress.

The Subscriber Identification Module or Subscriber Identity Module (SIM) card holds all of a subscriber’s personal information and phone settings. In essence, it is the subscriber’s authorization to use the network. It also holds the phone number, personal security key and other data necessary for the handset to function. The subscriber can then choose either a post-paid account or a prepaid account. The main difference is that in a postpaid account, the SIM card is registered under the subscriber’s name including all the details necessary to identify said subscriber, while in a prepaid account, no registration is necessary, and anyone can simply buy a prepaid SIM card and start using it.

No one disputes the convenience of a "contract free", "commitment free" prepaid cellular service and all the advantages it brings. However, one cannot also discount the fact that there are many disadvantages with using a prepaid SIM card, the main one being the fact that the user cannot be identified. This makes it easier to commit mischief and crimes.

It cannot be denied that prepaid SIM cards are used by criminals in making ransom demands, used by different gangs like the "dugo-dugo gang" to commit robbery, used by individuals to make threats and harass others and it is even used by unscrupulous individuals to impersonate personalities and solicit donations. Basically, anyone with a prepaid SIM card can do anything and not be caught because he cannot be traced, his identity cannot be determined and he can simply throw away the SIM card after use.

It is therefore about time that we follow the example of other countries like Kenya and Singapore and start requiring registration of prepaid SIM cards. Since 2006, the Singapore government has made the prepaid SIM registration a mandatory requirement. This means that the card must be registered under the name of the person who will be using it and the person will be required to produce his/her passport or Singapore ID at the time of buying the prepaid mobile card.

With this, it would be easier to track down the owner or user of the prepaid SIM card. While it may not guarantee that the criminal user of the SIM card would be caught, at least there is an increase in the chances that they will be unlike the aero chance of identification when there is no registration required.

In view foregoing, immediate passage of this bill is immediately requested.
