AN ACT
PROHIBITING THE CONSUMPTION OF ALCOHOL IN ALL PUBLIC PLACES
AND PROVIDING PENALTIES FOR VIOLATIONS THEREOF

EXPLANATORY NOTE

The 1987 Philippine Constitution provides that: "The maintenance of peace and order, the protection of life, liberty, and property, and the promotion of the general welfare are essential for the enjoyment by all the people of the blessings of democracy." (Article II, Sec. 5).

The Lancet, a weekly peer-reviewed general medical journal and one of the world's oldest and best known general medical journals, reported that "Alcohol is more harmful than heroin or crack when the overall dangers to the individual and society are considered."

The study by the Independent Scientific Committee on Drugs, a United Kingdom-based independent drugs advisory committee, also reported that the findings were consistent with the conclusions of previous expert reports that aggressively targeting alcohol harms is a valid and necessary public health strategy (http://www.bbc.com/news/uk-11660210).

In 2008, the Pew Center on the States reported that: "an astounding one in every 100 adults in the U.S. was behind bars. While drunk driving gets the most attention, the incidence of other alcohol-involved crimes including domestic violence, underage drinking, and assault has reached staggering proportions."

The study found that 5.3 million adults or 36% of those under correctional supervision were drinking at the time of their offense while 40% of state prisoners convicted of violent crimes were under the influence of alcohol at the time of their offense (The Pew Charitable Trusts, One in 100: Behind Bars in America, 2008).

Alcoholism and violence have clearly become key public health issues that require urgent attention. Hence, it is imperative for the country to initiate proactive policies to curb alcohol consumption in public places.

This measure is a proactive response to the growing clamor of the people and President Rodrigo Roa Duterte’s commitment to curb criminality in the country by banning the use of beer, wine, liquor and similar intoxicating beverages in public places.

It also seeks to prohibit business establishments such as restaurants, clubs, hotels, retail stores, and supermarkets to sell or serve alcohol from twelve (12)
o'clock to eight (8) o'clock in the morning, except those located in Metropolitan Manila and highly urbanized cities in the country which may be allowed to sell and serve alcohol between two (2) o'clock and eight (8) o'clock in the morning. Such exception takes into consideration the peculiar social life and interactions of the populace and commercial and economic activities in highly urbanized areas.

President Duterte’s pronouncement that a nationwide liquor ban can improve the quality of life stands of the World Health Organization’s findings that:

- Worldwide, 3 million deaths every year result from harmful use of alcohol, this represent 5.3 % of all deaths.
- The harmful use of alcohol is a causal factor in more than 200 disease and injury conditions.
- Overall 5.1 % of the global burden of disease and injury is attributable to alcohol, as measured in disability-adjusted life years (DALYs).
- Alcohol consumption causes death and disability relatively early in life. In the age group 20–39 years approximately 13.5 % of the total deaths are alcohol-attributable.
- There is a causal relationship between harmful use of alcohol and a range of mental and behavioural disorders, other noncommunicable conditions as well as injuries.
- The latest causal relationships have been established between harmful drinking and incidence of infectious diseases such as tuberculosis as well as the course of HIV/AIDS.
- Beyond health consequences, the harmful use of alcohol brings significant social and economic losses to individuals and society at large.

Hence, immediate approval of this bill is earnestly requested.
