AN ACT
PROVIDING FOR A NATIONAL EMPLOYMENT ASSISTANCE PROGRAM AND APPROPRIATING FUNDS THEREFOR

EXPLANATORY NOTE

One out of every five Filipinos is considered poor. As reported by the Philippine Statistics Authority, the poverty incidence among Filipino individuals in the first semester of 2018 was estimated at 21 percent\(^1\). Our current population is roughly 110 million, this means that over 20 million Filipinos live in poverty.

Poverty is more than the lack of income and resources to ensure a sustainable livelihood. Its manifestations include hunger and malnutrition, limited access to education and other basic services, social discrimination and exclusion as well as the lack of participation in decision-making\(^2\). High poverty incidence spells a host of other problems, thus, poverty reduction results in solutions for a number of other problems as well.

The reduction of poverty is at the heart of the development agenda both nationally and globally. This is reflected in the Philippine Development Plan, and the worldwide commitment toward the Sustainable Development Goals. On the part of the current administration we have the Ambisyon 2040, which envisions a Philippines in 2040 where no Filipino is poor, no Filipino is ever hungry and Filipino families live in comfortable homes with the desired amenities and secure tenure\(^3\); and the Philippine Development Plan 2017-2022 which aims to reduce poverty to 13 to 15 percent by 2022.

In the ADB’s report on Poverty in the Philippines, one of the identified main causes of poverty in the country is recurrent shocks and exposure to risks such as economic crisis, conflicts, natural disasters, and "environmental poverty." The subsequent loss of employment is the most common outcome resulting from these causes. In turn the loss of employment and loss of income pushes those already at risk into poverty, and the poor more deeply mired in poverty.

The Poverty Assessment\(^4\) report by the World Bank recommends managing disaster risks and protecting the vulnerable as a policy direction. The government has several programs in line with this. The DOLE has the Adjustment Measures Program (AMP) and the Tulong Panghanapbuhay para sa Ating Disadvantaged/Displaced Workers (TUPAD). These programs provide for the temporary employment of the people in afflicted areas or situations. The most notable ones to date are the AMPs done by the government in response to the K to 12 Integration and the Boracay and Mining closures.

This bill aims to institutionalize these emergency employment programs into the National Employment Assistance Program. With the institutionalization of these programs there would be no need to convene special task forces that would formulate and implement the government’s plan of action for similar incidents as the mechanisms and funding for these programs are already in place. Hence government action would be swift and more efficient.

Due to the geographic location of the Philippines, our country has a high risk of experiencing natural disasters. An average of 20 typhoons make landfall in the Philippines every year. At least 60 percent of the country’s total land area is exposed to multiple hazards, and 74 percent of the population is vulnerable to their impact\(^5\). The institutionalization of a national emergency employment program would mitigate the negative impacts of these disastrous events as well as contribute to the poverty reduction efforts of the government.

In light of the foregoing, the approval of this bill is earnestly sought.
