EXPLANATORY NOTE

According to available data, there are only 0.2 physicians, 0.4 nurses, and 1.7 midwives for every 10,000 members of the population in the Philippines. These numbers are ten times less than the recommended ratio set by the World Health Organization. Because of the dwindling number of health workers in the Philippines, the Barangay Health Workers have become such an important contributor to help mitigate the lack of workforce in the health sector. These Barangay Health Workers are being utilized more and more in order to provide health services in rural and remote areas. However, there exists no measure that ensures that all Barangays are covered.

It is the role of the State to find the means to deliver health services and its accessibility. Thus, it is our imperative duty as legislators to ensure the full and functional delivery of health services for the whole country, in order to comply with the mandate of the 1987 Philippine Constitution that guarantees the protection and promotion of the health of its citizens.

This proposed measure shall provide at least one (1) Barangay Health Worker in every barangay throughout the country after proper accreditation with the local health board. Furthermore, barangay health workers will be entitled to allowances and other benefits accorded to appointed barangay officials. More importantly, our faithful barangay health workers will be accorded with security of tenure.

In view of the foregoing, the immediate passage of this bill is earnestly sought.
