In today's environment, to remain viable and stay ahead, organizations must continually scour their operations for opportunities to improve. Executives today expect continual improvement – real and lasting improvements that create public satisfaction, improve public service effectiveness and internal process efficiencies. Improvements that are realized by bottom line results.

Achieving excellence is the result of high performance throughout the entire organization. Leaders at all levels of an organization must relentlessly pursue the performance edge; those actions that will propel the organization to the next level of internal and external performance.

The state cannot legislate excellence, but can expect it, support it and acknowledge it when it occurs. It is in this light that this bill seeks to create a process that will oversee the journey to excellence and will encourage the most vital aspects of the Philippine government to be managed at a world-class level.

In view of the foregoing, the passage of this bill is earnestly sought.
