Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City, Metro Manila

EIGHTEENTH CONGRESS
First Regular Session

House Bill No. 3948

Introduced by Representative Sol Aragones

EXPLANATORY NOTE

In the 1987 Philippine Constitution, the protection and promotion of the health of every Filipino is mentioned several times. In Article II, Section 15, it states that "The State shall protect and promote the right to health of the people and instill health consciousness among them." In Article XIII, Section 11, it also states "The State shall adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable cost. There shall be priority for the needs of the underprivileged, sick, elderly, disabled, women, and children. The State shall endeavor to provide free medical care to paupers."

According to the latest data from the Philippine Statistics Authority, the out-of-pocket expenses of Filipinos for medical care reached almost PHP 300 Billion or more than 56% of the total medical expenditures for the whole country. The PhilHealth spending was also alarmingly lower than the target. PhilHealth was expected to shoulder almost 20% of the total medical expenditure, but they were only able to spend on 11% of it. According to World Bank data, the rest of the world spends an average of 45.5% for out-of-pocket expenditures for medical care.

The information above provides insights on the efficiency and effectiveness of our national health care system. Certainly, the PhilHealth operations can be improved and the out-of-pocket expenditures by the Filipino people can also be reduced. Currently, 92% of the total population are covered by PhilHealth but only 12% of total eligible members were able to utilize the coverage afforded by PhilHealth. It underlines the need for a more efficient and more proactive system in order for the Philippines to keep up with the global standards.

With the passage of Republic Act No. 11223 or the Universal Health Care (UHC) Law, many of the concerns of our countrymen are being addressed. Every Filipino, paying or not, are enrolled in PhilHealth. The benefits under the UHC Law rely on the health benefit packages as determined by the PhilHealth. As such, out-of-pocket expenditures may still arise if the benefit packages are not enough to cover the medical needs of indigent and poor patients.
This proposed measure intends to reduce, if not eliminate, out-of-pocket expenditures of indigent and poor patients, including non-medical expenses like transportation costs, by establishing Malasakit Centers. These Malasakit Centers will also be a Health System Enabler to improve assessment for patient assistance and referral to provide much needed system support for patient investigation.

The immediate approval of this bill is therefore earnestly sought.
