First Regular Session

House Bill No. 4023

Introduced by HON. ROZZANO RUFINO B. BIAZON

EXPLANATORY NOTE

This bill seeks to create the position of Presidential Physician to ensure and protect the President’s health and well-being and those of his or her immediate family. The Presidential Physician shall also be the primary source of information with regard to the President’s state of health in case of serious illness.

Like in other countries, the demands upon the President of the Philippines are extraordinary. To withstand the kind of stress and pressure that comes with the job requires tough mental and physical reserves from the President in order to be an effective leader of the country. Thus, his or her health is of utmost importance and must be ensured and protected.

So important is the health of the President that he or she must have a physician must at all times be available in order to see to his general well-being. With a Presidential Physician, the President is assured of someone whom he or she can truly rely on in as far as his health is concerned. It is a position of trust and confidence. Moreover, the public has to be assured that the most powerful person in the country is physically and mentally fit and can withstand the rigors of the Presidency. While, the public needs confirmation and assurance that we have a functionally fit individual running the nation’s affairs, the degree of health information needed by the public and how it is obtained and communicated are matters of considerable debate. In order to avoid unnecessary confusion and needless speculation of the President’s health, it would be better to come from the one person that truly knows the President’s fitness – the physician to the President.

With the above premises considered, immediate approval of this bill is earnestly sought.
