EIGHTEENTH CONGRESS
1st Regular Session

House Bill No. 4243

Introduced by Hon. Francis Gerald Aguinaldo Abaya

EXPLANATORY NOTE

At present, food insecurity is undeniably one of the major issues faced by our government and countrymen. It is unfortunate that a country rich in natural resources cannot provide for the basic needs of its inhabitants. In 2018, the Philippines' Global Hunger Index (GHI) is 20.2, ranking the country 69 out of 119 and placing it under the "Serious" category in the GHI. The data for GHI scores also shows that hunger poses dangerous health consequences for the country, with 20.6% of people being underweight and 32.2% being stunted. Having low weight and being stunted can hinder an individual from developing fully which can greatly affect his livelihood and overall performance of daily activities. These are very alarming numbers that speaks about the situation of our fellow Filipinos. If we are to truly achieve economic development, we should prioritize this issue on hunger.

Moreover, the Philippines is a signatory and one of the first nations to ratify the Universal Declaration of Human Rights. It is notable that Article 25, Section 1 of the said declaration states that "Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food." Article II, Section 15 of the 1987 Constitution also provides that the State shall protect and promote the right to health of the people ans instill health consciousness among them. Consequently, the State needs to commit to provide every Filipino access to adequate food and nutrition and to ensure that every family has a way to raise their income above the poverty threshold.

This proposed measure creates a system for the State to combat hunger and poverty through the institutionalization of a National Feeding Program. At the core of this program is the a targeting system which establishes a nationwide database that identifies individuals that have the least access to proper nutrition. Coupled by the streamlining of the food distribution system is an effective food procurement system wherein the supplies needed by the National Feeding Program will come from small-scale producers. This would provide a steady market for the small-scale producers who are incapable of
competing with large industry producers. Through this, we are also creating jobs for our citizens and boosting the agricultural sector of the country.

Our country’s most important resource is its citizens and therefore, we should strive to end hunger.

For the foregoing reasons, the approval of this bill is earnestly sought.
