HOUSE BILL NO. 4319

Introduced by Rep. Bernadette Herrera-Dy

AN ACT AMENDING THE PROVISIONS OF COMMONWEALTH ACT NO. 146, OTHERWISE KNOWN AS THE "PUBLIC SERVICE ACT," TOWARDS PUBLIC INTEREST AND OTHER PURPOSES

Explanatory Note

The EU - Philippines Business Network (EPBN) determined that the country ranks as one of the worst in the region in two public services: mass transportation and telecommunications. In the same report, it was found that Filipinos have the longest commute in the world with at least 2.2 hours of productive time wasted on traffic. EPBN also reported that the Philippines has one of the slowest internet connections in the world with a download speed that is half the global average. The country also has one of the most expensive internet connectivity plans compared to other Asian countries with similar economies. Despite this, the Philippines is reported to have a huge and increasing economic potential mainly because of its big population, estimated at 108 million as of mid-2018 and the 13th largest in the world. This means that there are more entrepreneurs, workers, producers, and consumers. With this advantage, the public should be given more opportunities to explore and to maximize in order to remedy the effects of the aforementioned issues.

Commonwealth Act No. 146 or the "Public Service Act" have served its purpose for more than 80 years. It is more than necessary to update the law to cater to the ever-changing needs of the public. The law gave such a broad definition of "public service" which is not currently applicable to the needs of the citizens. Over the years, various agencies have also been created by law to administer such services. Thus, there is a need to redefine sectors and to develop various means in order to adjust to the “signs of the times.” Furthermore, there is a lack of healthy competition among public service providers that must be addressed. To further boost the economy, reforms must be pursued in order to give quality service to Filipinos.

In accordance with the joint letter of the Department of Finance (DOF), Department of Budget and Management (DBM), and the National Economic and Development Authority (NEDA) which urges congress “to push for better economic reforms,” it is only necessary for the state to push for the amendment of the Public Service Act. This proposal seeks to revise the outdated law on public services. Public service and public utility have been used interchangeably which have caused various loopholes in the implementation of the current law. Through this bill, such differences will be determined and appropriate measures shall be pursued. Also, rates and fees shall be adjusted and the functions of administrative agencies shall be duly recognized. The bill also seeks to give enough leeway for healthy competition among public service providers. Lastly, the proposed amendments shall also revise penalties and fines to further regulate erring agencies.

It is the government’s responsibility to prioritize its citizens through the review of policies that no longer benefit the citizens’ needs. To this end, the state shall pursue a policy that shall amend the
provisions of Commonwealth Act No. 146, otherwise known as the "Public Service Act," towards public interest and other purposes.

In view of the foregoing, the passage of the bill is earnestly sought.

BERNADETTE HERERRA-DY
AN ACT AMENDING THE PROVISIONS OF COMMONWEALTH ACT NO. 146, OTHERWISE
KNOWN AS THE "PUBLIC SERVICE ACT" TOWARDS PUBLIC INTEREST AND OTHER
PURPOSES

Section 1. Transfer of Functions of the Public Service Commission to Administrative
Agencies. Currently, the mandate of the Public Service Commission has been delegated to
various administrative agencies that manage several public services. This Act shall abolish the
Public Service Commission as a single entity and recognize the transfer of jurisdiction from the
Commission to various administrative agencies as prescribed by law. These agencies shall be
determined by Congress.

For the purposes of this Act, administrative agencies shall refer to agencies with which the
authoritative, administrative, and management powers of the Public Service Commission were
transferred. These agencies also work in accordance to their charters and mandates as
prescribed by law. This shall be done in order to rationalize and to consolidate the functions of
administrative agencies in their management of public services and public utilities in the
Philippines.

Section 2. A new section "Section 13 (d)" shall be added to Section 13 of Commonwealth Act
No. 146 and this is further amended to read as follows:

"(d) Public Utility: is subset of public services, with much smaller in scope than the latter. It refers
to the direct transmission or distribution, and delivery through a network, of a commodity or service
of public consequence. Public utilities shall be classified into four categories: 1. the transmission
of electricity; 2. distribution of electricity; 3. water works and sewerage systems; and 4.
telecommunications. These shall be regulated pursuant to Article XII, Section 11 and 17, and
Article IX-c, Section 4 of the Constitution.

Concessionaires who operate by virtue of Concession Agreements with any administrative
agency are also deemed and considered, for all intents and purposes, as public utilities. As public
utilities, the concessionaires are put to a higher degree of responsibility in the provision of services
to the public. Other effects include: (a) the concessionaires’ cannot declare their income tax as
part of operating expenses (opex), as such are not expenses which contribute to or are incurred
in connection with the production of profit of a public utility; (b) payment of income taxes are solely
the responsibility and burden of the concessionaires as public utilities, and such taxes are not
transferrable to consumers; and (c) the determination of what formulas to use to compute a
reasonable return for the public utility is purely and exclusively the discretion of the government,
who may determine through consultations with the concessionaires and other stakeholders and
regulatory bodies and in accordance to Section 4 of this Act. The classification of the
concessionaires as mere agents and contractors of administrative agencies are considered only applicable insofar as the infrastructure-related powers granted by law to the administrative agency.

No other business or service shall be classified as a public utility unless otherwise subsequently provided by law, approved by Congress and the appropriate agencies, and upon recommendation by the Philippine Competition Commission (PCC) and the National Economic and Development Authority (NEDA)."

This provision shall not bar the application of performance-based rate regulation should the administrative agency regulating such public service deem it efficient and in the public interest.
