EIGHTEENTH CONGRESS OF THE
REPUBLIC OF THE PHILIPPINES
First Regular Session

HOUSE OF REPRESENTATIVES

H. B. No. 4360

Introduced by Rep. Vilma Santos-Recto
6th District of Batangas

AN ACT
PROHIBITING THE CONVERSION OF IRRIGATED AND IRRIGABLE
AGRICULTURAL LANDS FOR NON-AGRICULTURAL USES, AMENDING FOR
THE PURPOSE SECTION 20 OF REPUBLIC ACT NO. 7160, OTHERWISE
KNOWN AS THE LOCAL GOVERNMENT CODE OF 1991

EXPLANATORY NOTE

Land and soil resources, particularly those devoted to agricultural uses, are important
resources of the country because they are directly related to food production.1 Of the
Philippines’ land area of roughly 30 million hectares, 12.51 million2 are considered
agricultural. Unfortunately, sustainable land use for food production is under threat due to
massive conversion of these lands for non-agricultural uses – a key contributor for food
insecurity and rising costs of basic food commodities in recent years.

The rampant conversion of prime agricultural land which is partly propelled by rapid
urbanization and population growth, is a serious threat to the sustainability of a primarily
agricultural economy like that of our country. A number of agricultural lands that are critical
to food production have been transformed into subdivisions, commercial centers, golf courses
and export processing zones, among others. According to the Department of Agrarian Reform
(DAR), a total of 97,592.5 hectares of agricultural land—the size of Metro Manila and Cebu
City were approved for conversion to non-agricultural purposes from 1988 (when the
Comprehensive Agrarian Reform Law took effect) to 2016.3 And of the approved conversion

applications in DAR regional offices over the same period, 80.6 percent of the land is in Luzon, with the provinces of Cavite, Laguna, Batangas, Rizal and Quezon (Calabarzon) taking up more than a quarter of the total.\(^4\) Visayas accounted for 7.8 percent and Mindanao, 11.6 percent.\(^5\) For the past 28 years since 1988, DAR regional offices approved a total of 40,308.8 hectares while the national office approved 57,283.7 hectares for land conversions.\(^6\) Pending applications for conversion, agricultural land reclassified by local government units and illegally converted lands are not yet included in the above-cited figures. In 2018, the Department of Agriculture (DA) showed that approximately 50,000 hectares of prime agricultural lands are lost to industrial and residential companies every year.\(^7\) Consequently, DAR issued Administrative Order No. 5, s. 2018 authorizing the DAR Secretary or Regional Director to call for a public consultation before acting on an application for land use conversion.

It is disheartening that these land conversions caused the displacement of our farmers and effectively destroyed their livelihood which immensely contributed to the increase of landlessness and unemployment in the countryside. It has disrupted the ecological balance of our environment which could impact on local climate change and imminent water crisis.

Thus, consistent with the policy of promoting food security to ensure the availability, adequacy and accessibility of food supplies to every Filipino, this bill imposes a ban on agricultural land conversion on all irrigated and irrigable lands in the country.

This bill seeks to arrest the irresponsible and indiscriminate conversion of irrigated and irrigable agricultural lands into residential, commercial, industrial and other zones. It also seeks to amend Section 20 of the Local Government Code by requiring additional approval from the DA, DAR, Department of Environment and Natural Resources and local government units before a land conversion application can be granted. Such amendment would rationalize the land conversion process and uphold the priority of the government to uphold food security to our people.

In view of the foregoing, the immediate approval of this bill is earnestly sought.
