First Regular Session

HOUSE BILL NO. 4414

Introduced by Rep. Sonny L. Lagon, Party List, AKO BISAYA

EXPLANATORY NOTE.

This bill seeks to establish a specialty medical institution in Cebu City that shall specialize in kidney and allied diseases to bring specialized medical services closer to kidney patients from the Visayas region and improve the delivery of health services in general.

Kidney diseases, especially End Stage Renal Disease, are the 7th leading cause of death among Filipinos. Data from the National Kidney and Transplant Institute show that 20 percent of Filipinos were diagnosed with chronic kidney disease, based on the glomerular filtration rate (GFR) which measures kidney function. Presently, there are around 70,000 patients on dialysis, with thousands on the waiting list for a kidney transplant, but only 400 are able to undergo transplantation annually.

The National Kidney and Transplant Institute (NKTI) located in Quezon City is hailed as one of the leading medical institutions in Asia that provide quality medical services for the treatment of kidney diseases. However, patients from the provinces are burdened with additional expenses when they seek treatment at the NKTI. Further, the Institution is constantly saddled with a long list of patients that only grow every year. Hence, it is ideal that a similar institution be established in the Visayas to enhance access to specialized medical services for kidney patients.

Pursuant to the Constitutional mandate for the State to adopt an integrated and comprehensive approach to health development, it is essential for the Government to recognize that the increasing cases of kidney diseases in the country pose serious threats to the well-being of the people and the country’s productivity in general considering the huge financial burden that the treatment of the disease entails.

In view of the above premises, the prompt approval of this measure is earnestly sought and recommended.
