EIGHTEENTH CONGRESS
1st Regular Session

House Bill No. 4896

Introduced by Representative ERIC GO YAP

EXPLANATORY NOTE

Filipinos are widely known for being "family-oriented" and "hardworking". These traits are commonly found in the Senior Citizens working until their retirement age. At the age of sixty (60), majority of Filipinos still prefer to remain employed rather than be stagnant. The experiences they acquired during their tenured years are still present and can continue to contribute to the community.

Age has become a barrier in employment for the Senior Citizens. Landing a job has become a challenge resulting to unemployment that could lead to being idle and they deteriorate faster and becomes a burden to their family and to the government.

Based on the Commission on Population and Development on 2018, there are 8.7 million Filipinos over 60 years old, representing 8.2 percent of the country's total population of 107 million that can contribute for the economy and can serve the country. 70% of Filipino Senior Citizens still prefer working because most of their pension and retirement savings are not enough to sustain their family and needs.

Furthermore, there are private firms that are already employing capable senior citizens in their respectable positions and majority of these seniors are productive and are useful. Thus, seniors should be granted job opportunities rather than disqualifying them for their age.

This bill is being filed for the purpose of more senior citizens landing employment and allowing private firms employing them, equal rate of deduction from gross income as private firms employing PWDs at the rate of twenty-five (25)
percent, and encouraging more private companies to participate, regardless of tax
deduction type they employed.

For the benefits of our dear Senior Citizens, approval of the bill is earnestly
sought.
