EXPLANATORY NOTE

In addition to lack of classrooms and school buildings, one of the major problems of the Philippine public education system is the limited books and school supplies. To at least provide a short-term solution to this problem, the teachers themselves are forced to spend money from their own pockets just to bear the cost of teaching supplies. This is despite the fact that public school teachers are among the lowest paid professionals.

Teaching supplies help to guarantee the clarity of explanation and make it easier for students to understand. These are essential to ensure the daily functioning of teaching and to enhance the learning experience of the students. Inaction on this matter would not only reduce the already low salary received by the public school teachers, but would also worsen the quality of education that is received in public schools.

Hence, this bill provides for teaching supplies allowance of Php 5,000 every month for public school teachers, including those in the alternative learning system of the Department of Education.

In view of the foregoing, approval of this measure is earnestly sought.
