First Regular Session

HOUSE BILL NO. 5172

Introduced by HONORABLE MARK. O GO

EXPLANATORY NOTE

This measure seeks to amend certain provisions of Republic Act No. 8479 known as the “Downstream Oil Industry Deregulation Act of 1998.”

Republic Act 8479 was enacted in order to liberalize and regulate the downstream oil industry in order to ensure a truly competitive market under a regime of fair prices, adequate and continuous supply of environmentally-clean and high-quality petroleum products.

Since the enactment of the law on Oil Deregulation in 1998, consumers have been faced by fluctuating and high fuel prices. This also created disparities in pump prices in cities and provinces throughout the country resulting to transport strikes affecting public commuters. High price of oil burdens the people which equates to a lesser purchasing power on the part of the consumers. Pursuant to a study conducted by the Department of Energy, under a deregulated regime, changes in world oil prices are more immediately reflected in local pump prices. Even if the Philippines were producing significant quantities of crude oil, the country would still face higher local oil prices when world oil prices are high. At present, deregulation has allowed the unguarded increase of oil prices with adverse impact on the prices of basic commodities and other services.

Article XII Section 19 of the Constitution provides that the State shall regulate or prohibit monopolies when the public interest so requires. No combinations in restraint of trade or unfair competition shall be allowed.

It is therefore the role of the Department of Energy to ensure fair and reasonable pricing across areas, cities and municipalities. Such mandate of the agency will certainly prevent monopoly, oligopoly and will equally avert unfair competition aligned with the State’s responsibility to promote social justice and equitable national economy for its people.

In view of this, the passage of this measure is earnestly sought.
