EXPLANATORY NOTE

The consumption of chocolate around the world has been gradually increasing annually by three percent (3%), with its market demand growing steadily in regions like Central Asia and Eastern Europe, mainland China, India, and various states of the Russian Federation. Major chocolate processors such as Hershey’s, Nestle, and Mars, have been a factor in the growing demand for chocolate.

The Philippines is known to import large amounts of chocolate every year. This is due to the very rich and fertile Philippine soil which is well suited for the production of cacao. As of 2008, the country reported 1.5 million cacao trees with production at 6,000 metric tons annually. However, the cacao industry in the Philippines has been steadily dwindling due to the complex economic, social, and environmental issues.

The state must have a hand in the growth of cacao production in the country. This bill seeks to address this issue by establishing a research and development center made specifically for cacao production, the country will be able to compete globally and possibly produce one of the best chocolates around the world.

In view of the foregoing, the passage of this bill is earnestly sought.
