HOUSE BILL NO. 6359

Introduced by the Honorable Ann K. Hofer

EXPLANATORY NOTE

The National Kidney and Transplant Institute reports that kidney diseases are the 7th leading cause of death among Filipinos, with one Filipino developing chronic renal failure every hour or about 120 Filipinos per million population per year. From only 4,000 cases back in 2004, the number escalated to close to 23,000 in 2013. The Department of Health noted that among the kidney diseases, the most dreaded is the End Stage Renal Diseases (ESRD), which requires either lifetime dialysis or kidney transplant. The Philippine Health Insurance Corporation (PhilHealth) describes this illness, also referred to as Chronic Kidney Disease or CKD Stage 5, as an advanced stage of kidney disease wherein the kidneys have lost nearly all their ability to do their job effectively, eventually necessitating dialysis or kidney transplant in order for the patient to survive.

In 2015, PhilHealth issued Circular No. 024-2015, increasing the maximum number of hemodialysis sessions a member can avail from 45 to 90 sessions per calendar year. However, the maximum of 90 sessions is shared among the principal and his/her dependent/s. To illustrate, a principal member with no dependent/s shall be granted 90 sessions; while, in cases where both the principal and dependent/s are undergoing hemodialysis, they shall both share the maximum of 90 sessions only. While this new dialysis package increased the number of sessions covered by PhilHealth, it remains inadequate to fully cover the number of hemodialysis sessions needed by patients with CKD Stage 5, which may reach three times a week or 156 sessions a year.

This bill seeks to mandate the Philippine Health Insurance Corporation to further increase its hemodialysis treatment coverage of members of the National Health Insurance Program to 156 sessions per year.
