AN ACT
ADDRESSING FOOD SECURITY CONCERNS THROUGH INTEGRATING INSTRUCTIONAL GARDENS IN PRIMARY AND SECONDARY SCHOOL CURRICULA AND PROMOTING THE USE OF URBAN AGRICULTURE, AND FOR OTHER PURPOSES

EXPLANATORY NOTE

The State is mandated to protect and promote the right to health of the people and instill health consciousness among them (Section 15, Article II of the 1987 Philippine Constitution).

One of the goals of the government is to be food self-sufficient. However, with rapid population growth and industrialization, this objective may be hard to realize -- many are still experiencing hunger and malnutrition.

The Philippines has an estimated population of 105 million and urban areas have the highest concentration. In 2007, the Department of Education (DepEd) introduced ‘Gulayan sa Paaralan,’ a concept where students in public elementary and secondary schools set up their own farms inside their campus, in support of the school-based feeding program.

Research suggests that school gardens are an important tool to motivate kids and stimulate learning in classrooms. In a study conducted by the University of Maryland among school gardens in Washington, D.C., USA, researchers noted ‘numerous positive effects’ of so-called garden-based learning on fifth-grade students.\(^1\)

For reading, 61 percent of students in garden schools scored “proficient or advanced,” compared with 38 percent in schools without gardens. For math, the difference was 56 percent compared with 36 percent, and for science, 47 percent against 21 percent.\(^2\)

---

\(^2\) Ibid.
Clearly, urban agriculture has become an interesting topic not only in schools but also in communities and non-profit organizations all over the world in efforts to sustain food security and develop livelihoods.

This bill seeks to institutionalize and strengthen DepEd’s ‘Gulayan sa Paaralan.’ The concepts of urban agriculture, vertical farming will be integrated in the curriculum of both public and private institutions.

Local governments, for their part, will also be mandated to grant incentives for urban agriculture efforts in their areas, while tax perks await grants, endowments, donations, or contributions and technical assistance provided by private individuals or corporations to schools for the promotion and implementation of institutional gardens in schools.

Once this bill is enacted, this program could address food security concerns and might even drum up the youth’s interest in agriculture or ecology, among other subjects that kids might come across when taking care of their ‘farms.’ Young minds are not only introduced to a concept that urban spaces have never been set up in the first place, but it is also an essential platform for connecting them to nature and investing for their future.

As such, approval of this measure is earnestly sought.

AN ACT

ADDRESSING FOOD SECURITY CONCERNS THROUGH INTEGRATING INSTRUCTIONAL GARDENS IN PRIMARY AND SECONDARY SCHOOL CURRICULA AND PROMOTING THE USE OF URBAN AGRICULTURE, AND FOR OTHER PURPOSES

Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:

SECTION 1. Short Title. - This Act shall be known as the "Instructional Gardens and Urban Agriculture Act of 2020."

SEC. 2. Declaration of Policy. - It shall be the policy of the State to promote food security, food quality and improved health; fight hunger and malnutrition and poverty; and improve quality of environment through greening, reduction in pollution, and creation of savings in household expenditures. Towards this end, key reforms for the development of appropriate, cost-effective, and environmentally safe agricultural practices are hereby encouraged in order to ensure the food security of the country.

SEC. 3. Definition of Terms. - For purposes of this Act, the following terms shall be defined as follows:

a) Instructional Gardens refer to a program of instruction in all elementary and secondary schools, where knowledge and skills, not only in urban agriculture and vertical farming, but in agricultural food production in general, are imparted to school children through relevant theories and actual engagement in agricultural cultivation/production. The theories and actual production shall revolve around the concepts of composting, waste management techniques, healthy and nutritious farm produce, sustainable farm practices, among others.
b) Urban Agriculture refers to the practice of cultivating, processing and distributing of food in or around a village, town or city. Urban agriculture also involves animal husbandry, aquaculture, agro-forestry and horticulture.

c) Vertical Farming refers to the method of farming that is brought to the urban space by employing the concepts of indoor agriculture in sky scrapers and other modern buildings.

SEC. 4. Promotion of and Comprehensive Research on Urban Agriculture and Vertical Farming. - For purposes of this Act, the respective Secretaries of the Department of Agriculture (DA) and the Department of Science and Technology (DOST) are hereby mandated to promote the use of urban agriculture and vertical farming in the country’s urban areas and in other areas in the country where such farming methods are suited, as an intervention mechanism for further addressing food security concerns of the country.

Idle and/or abandoned government lots and buildings owned by either the national government or local governments or available land resources in state universities and colleges shall be considered for growing crops, raising livestock, and producing food using the said methods.

SEC. 5. Institutionalization of Instructional Gardens in School Curricula. - Instructional Gardens program shall be integrated in the academic curricula for elementary and secondary level students of both public and private academic institutions, particularly in subjects in Agriculture, Practical Arts, Home Economics, and/or other related subjects.

The Department of Education (DepEd), in coordination with the Department of Agriculture, shall promulgate the necessary rules and regulations for the implementation of this Section within six (6) months from the effectivity of this Act.

SEC. 6. Local Government Units’ Participation. - Local government units shall formulate a policy on the practice of urban agriculture and vertical farming, utilizing unused spaces and idle lands. This shall require the enactment of local legislation institutionalizing urban agriculture in all levels of the LGU. Local government units shall also grant necessary incentives to their constituents who actively participate in urban farming activities.

SEC. 7. Tax Incentives. - All allocations of grants, endowments, donations, or contributions and technical assistance provided by private individuals or corporations to schools for the promotion and implementation of Institutional Gardens in the school curricula, as certified by the DepEd, shall be exempt from taxes and duties.

SEC. 8. Implementing Rules and Regulations (IRR). - Within six (6) months from the effectivity of this Act, the Department of Agriculture and the Department of Science and Technology shall promulgate the necessary IRR to implement the provisions of this Act.

SEC. 9. Appropriations. - The amount necessary to carry out the provisions of this Act shall be included and incorporated in the annual general appropriations of the Department of Agriculture, Department of Science and Technology, and the Department of Education.
SEC. 10. Separability Clause. - If any provision of this Act is declared invalid or unconstitutional, the other provisions not affected thereby shall remain in full force and effect.

SEC. 11. Repealing Clause. - All laws, presidential decrees, executive orders, presidential proclamations, rules and regulations or parts thereof contrary to or inconsistent with this Act are hereby repealed or modified accordingly.

SEC. 12. Effectivity. - This Act shall take effect fifteen (15) days following its publication in at least two (2) newspapers of general circulation or in the Official Gazette.

Approved,
