The State recognizes its duty to protect its sovereignty and national integrity. To address current and emerging threats, it is necessary to acquire and establish defensive equipment, facilities and integrated military systems.

The Revised AFP Modernization Program provides a 15-year modernization program that guides the efforts to enhance the development and employment of capabilities of the Armed Forces. It is being implemented in three phases namely, Horizon I (2013-2017), Horizon II (2018-2022) and Horizon III (2023-2028). However, the rules set by the Government Procurement Reform Act have slowed down the procurement of additional military equipment in the recent years. The current procurement law has become an impediment to the modernization efforts of the AFP.

This bill seeks to address specific issues on defense purchases. It aims to capacitate and streamline the process of the acquisition of defense equipment, facilities, materiel, ordnance, services and integrated military systems. This measure also provides for the adoption of appropriate criteria to determine the best rated offer in the acquisition. Further, it will ensure that our acquisition system is at par to effectively respond to the threats to our national security.

In view of the foregoing, the immediate passage of this bill is earnestly sought.
