AN ACT AMENDING REPUBLIC ACT NO. 7581, AS AMENDED, OTHERWISE KNOWN AS THE “PRICE ACT” AND FOR OTHER PURPOSES

EXPLANATORY NOTE

In a span of three months, the Philippines has experienced two major calamities: the phreatic eruption of Taal Volcano in January, and the coronavirus disease (COVID-19) outbreak, which has already infected 8,772 persons all over the Philippines as of May 1, 2020. In both instances, people flocked to pharmacies and other sellers of medical supplies to buy, and unfortunately for some, hoard personal protective equipment (PPEs), such as face masks and goggles, and medical supplies such as alcohol and disinfectants.

For example, in the aftermath of the Taal Volcano phreatic eruption and consequent ash fall on January 12, 2020, N95 masks were allegedly sold in Manila for for Php200 per piece, compared to the previously prevailing price of Php25 to Php40 per piece, which translates to a 400% to 700% price increase.¹

Meanwhile, a few days after the first confirmed COVID-19 patient in the Philippines was reported on January 30, 3030, the Department of Trade and Industry (DTI) found that three profiteering pharmacies in Cebu City were selling overpriced surgical and N95 masks, by as much as 35%. Worse, even foreign nationals took advantage of the situation to profit from the unfortunate situation. For example, five foreign nationals were arrested by the Manila Police District for selling masks higher than the suggested retail price (SRP) set by DTI.

Given these troubling reports, there is a need to amend Republic Act No. 7581, as amended by Republic Act No. 10623, otherwise known as the Price Act, to ensure that the price and supply of personal protective equipment, including face masks and safety goggles and medical devices such as nebulizers, ethyl alcohol solution and oxygen cannulas remain stable during times of emergencies. For this purpose, this bill seeks to:

1) Define and include personal protective equipment and medical devices as prime commodities, the price of which may be subjected to price ceilings;

2) Clarify that price control measures for basic necessities and prime commodities, including personal protective equipment and relevant medical devices may also be imposed in times of outbreaks/epidemics, pandemics or public health emergencies; and

3) Increase the administrative fines and criminal penalties for violations of the Price Act.

The immediate passage of this bill is earnestly sought.
