HOUSE BILL NO. 6687

Introduced by Representative Roman T. Romulo

EXPLANATORY NOTE

It is the constitutional mandate of the State to give priority to education in order to foster patriotism and nationalism, accelerate social progress, and promote total human liberation and development. The State has the duty to protect and promote the right of all citizens to quality education at all levels and ensure universal access to such education.

In light of the economic instability brought about by the COVID-19 situation, we find the parents of learners in both private and public educational institutions, uncertain of the futures of their children. The Department of Education (DepEd) recently apprised our office of its forecast of the climate of the educational sector in the coming year. DepEd foresees a stark drop in enrollments in both the private and public sector which will cripple the educational sector. The impending domino effect will ultimately hamper the development of our national educational program which is already lagging behind our neighbors as it currently stands.

This representation authored a similar bill in the 15th Congress to provide eligible students of higher educational institutions an opportunity to be able to send themselves to the school of their choice. Through the said measure, the students will be able to procure funds to cover the cost of tuition fees and other living expenses, payable in installments after graduation. This is achieved through encouraging private and government financial institutions to provide loan structures which are suited to their situation as student-borrowers. These incentives will come in the form of tax credits for the banks which will offer them.

Considering the current circumstances, however, this proposed measure has been amended to accommodate parent-borrowers to be able to enroll their children in basic
education and higher educational institutions with favorable but fair terms. This measure will extend much needed support not only to the educational sector, but to our learners and their parents as well.

The duty to protect and promote the right of all citizens to access quality education is emphasized now more than ever. Let us do what we can to lighten the burden of our people and give them hope by making options such as these available to them.

For these reasons, the passage of this bill is earnestly sought.
