EIGHTEENTH CONGRESS
Second Regular Session

House Bill No. 7097

Introduced by HON. ALETA C. SUAREZ

EXPLANATORY NOTE

Article XIV, Section 1 of the 1987 Constitution states that, “The State shall protect and promote the right of all citizens to quality education at all levels, and shall take appropriate steps to make such education accessible to all.” In cognizance of this right to quality education, the Southern Luzon State University (the “University”) is mandated by Republic Act No. 9395 to provide advanced education, professional, technological instruction to its clients—the students. Likewise, the University serves as a vital tool in shaping the future through its researches and extension services.

As the only state university in Quezon Province, the Southern Luzon State University has forty-eight (48) program offerings and caters to nearly seven thousand (7,000) students coming from different towns in Quezon and Laguna. Among the programs offered by the University are Bachelor of Arts in Communication and Bachelor of Science in Electronics Communications Engineering. The Commission on Higher Education mandates these programs to have radio broadcasting as part of their laboratory classes. Hence, the installation, establishment, and operation of a radio broadcasting station in the University shall facilitate the achievement of this outcome-based education. The University has faculty members who are engineers and media lecturers capable and competent to operate radio broadcasting stations.

Given the state of public health emergency in the country due to COVID-19 pandemic, education is one of the sectors greatly affected by this crisis. Educational institutions are constrained to find and utilize new modalities, such as online teaching, to continue delivering quality education to its students. However, using digital platforms only highlighted the divide in economic status and the poor accessibility and unavailability of telecommunications services in various geographic locations in the province. The survey conducted among students of Southern Luzon State University showed that very few students have suitable gadgets for online learning. In addition, it
was reported that only sixty-eight percent (68%) of the barangays in Quezon Province has Cellular Mobile Telephone Service (CMTS) while only fifty percent (50%) have broadband connectivity. Hence, the need to explore other modalities arises. In line with this, the University proposes the use of radio broadcasting as an alternative mode of instruction to the students and, as an ancillary purpose, to serve as a medium for public information, disaster prevention, and relief operation to its students and community as a whole.

The University, in order to legally operate and maintain a radio broadcasting station, must have a legislative franchise of its own. As of this date, the University has none.

Thus, this bill seeks the grant of a franchise to install, establish, operate, and maintain radio broadcasting stations for educational, commercial, and other purposes to the Southern Luzon State University. Once passed and enacted into law, the franchise will provide the University with the capability to fully and extensively deliver its services to its clients and other stakeholders, as a response to the limitations imposed during this time of pandemic. It shall also promote efficient communication of vital information to the public in general.

In view of the foregoing, the approval of this bill is earnestly sought.
