HOUSE BILL NO. 7958

Introduced by Representative Diego “Nonoy” C. Ty

EXPLANATORY NOTE

The sound and balanced industrial, economic and social development of our country is pinned on the apt measures that the State undertakes to bring the progress of our country to greater heights and in a fair and proportional manner. Accordingly, the Special Economic Zone Act of 1995 was passed which created special economic zones in key strategic locations throughout the country. To date, there are already over four hundred (400) operating economic zones in the country which generate employment and drive the increase of productivity and family incomes which further advance the quality of life of the people within and around these zones.

Given the benefits that the creation of economic zones and freeport has brought to our country, the need to deliberately establish additional ecozones, especially in areas that have great potential to be developed into agro-industrial, commercial, manufacturing, tourist, banking, investment and financial centers becomes inexorable. Hence, in the light of extending progress and development from the major metropolitan areas to the least developed provinces of our country, this bill seeks to establish a special economic zone and freeport in the Province of Misamis Occidental, particularly in the Municipality of Plaridel in the First District. For many years, this part of the country has remained largely untapped mainly because much of the key priority developments are accorded to bigger and richer localities in the region. This is despite the economic potential of Misamis Occidental on the account of its strategic location that makes it the gateway in the northwestern Mindanao, coupled with rich natural resources and beautiful attractions that are viable for agro-industry and tourism, among others.

Therefore, in order to pave the way for economic development in the Province of Misamis Occidental particularly in the First District, there is a need to establish a special economic zone and freeport that will not only benefit the province but also its neighboring localities. As with other areas with established ecozones, such move will be seen as an all-inclusive response to the constant wish of the people in the District for the proportional distribution of wealth and development priorities in the country. The creation of an ecozone in the District will also allow the retention of local talents and skilled human resources as they will no longer be forced to flock to big cities for
employment and better opportunities which, overall, leads to the decongestion of the top metropolises in the country which further leads to better quality of life for our people.

Given the above premises, the approval of this bill is earnestly sought.
