EXPLANATORY NOTE

With the onset of the technological revolution, electricity has become a necessity for communities to grow and thrive. The modern society is driven by speed and permanence, not stagnancy and inactivity—it is driven through efficacy and sensibility. No longer should power outages be a bane to society. As such, it is imperative that the service we provide to the people meet such demands and present them with choices accorded to the consumers’ own terms.

The enactment of laws such as the Republic Act No. 9136, also known as the “Electric Power Industry Reform Act of 2001”, allowed the government to deliver on its promise of affordable basic services to its people and protect the public interest. With R.A. 9136 enacted, open access was permitted leading to retail competition and a thrust for developments, allowing key players in the industry the opportunity to provide a level of service worthy of the demands that the State necessitates. As a step onwards a more transparent and fair energy sector, the law afforded both the public and private sector a chance in the playing field; As a step further in fulfilling the mandate of ensuring sustainable supply of electricity for the people, the presence of fresh reliable electricity facilities is essential.

This bill seeks to provide such a dependable electric power distribution system to the people of the Province of Camarines Sur by granting the franchise to operate the Bicol Light and Power Corporation in the towns of Baao, Balatan, Bato, Buhi, Bula,
Nabua, And The City of Iriga. It seeks to address the issue of price control through realizing a regime of free and fair competition in the energy sector. Finally, it seeks to require standards that the grantee must attain in order to secure an effective partnership between the Government and the grantee, as well as maintain a high benchmark of the promised provided facility.

In view of the foregoing, the immediate passage of this bill is earnestly sought.
