AN ACT
ESTABLISHING A COVID-19 UNEMPLOYMENT REDUCTION ECONOMIC STIMULUS (CURES) FUND, INSTITUTING MECHANISMS FOR THE IMPLEMENTATION THEREOF AND APPROPRIATING FUNDS THEREFOR

Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:

SECTION 1. Short Title. — This Act shall be known as the “COVID-19 Unemployment Reduction Economic Stimulus (CURES) Act”

SEC. 2. Declaration of Policy. — The State recognizes that infrastructure in various socio-economic sectors is the backbone of the country’s economy.
With the possibility of an economic downturn and unemployment inevitably arising from the restrictive lockdown measures implemented by the Philippine Government to curb the transmission of the COVID-19 virus among Filipinos, it is hereby declared a policy of the State to develop more stimulus measures and implement interventions that will create new jobs, protect existing employment-generating activities and promote the equitable distribution of resources towards
the eradication of poverty and the integral inclusive development of the Filipino people.

For this purpose, the State shall: a) establish a Special Fund to be disbursed primarily for the implementation of infrastructure projects across these priority areas — health, education, agriculture, local roads, infrastructure, livelihood, including information and communication technology and tourism (HEAL IT); b) define the guidelines, criteria and standards in the access, implementation and evaluation of use of the special fund; and c) establish the government authority and body which shall be responsible for the collection, evaluation, approval and oversight of the projects and activities to be undertaken under the special fund.

SEC. 3. Appropriation, Automatic Release and Fund Availability.— The amount of One trillion five hundred billion pesos (P1,500,000,000,000.00) is hereby appropriated for the establishment of the COVID-19 Unemployment Reduction Economic Stimulus (CURES) Fund.

The budgetary requirements for projects approved for implementation under this Act shall be automatically released to the implementing unit in order to facilitate the start-up and completion of projects, and remove existing regulations and issuances that would impede the same.

Appropriation for the CURES Fund shall be made available as they are hereby appropriated for three (3) fiscal years from the year following its enactment into law under the following schedule: Five hundred billion pesos
(P500,000,000,000.00) on the first year; Five hundred billion pesos (P500,000,000,000.00) on the second year; and Five hundred billion pesos (P500,000,000,000.00) on the third year. Three (3) years after the approval of this Act, Congress shall enact legislation extending or modifying the same, or terminating the Fund. In case of the latter, the unobligated balance shall be made available for the general budgetary requirements of the year succeeding its termination.

SEC. 4. Eligibility. – Infrastructure projects under the priority areas such as health, education, agriculture, local roads, infrastructure, livelihood, information and communication technology and tourism (HEAL IT), shall be implemented through the CURES Fund: Provided, That a project to be eligible for implementation must, on the date of the submission of the application by the designated department or agency authorized to receive, screen and evaluate the project for implementation, meet the priority guidelines for the fiscal year under consideration by the Executive Cluster Committee established under this Act.

4.1. Implementing Units. – The implementation of projects under the CURES Fund shall be undertaken by the departments and agencies authorized by law or their charter to implement such class of projects. Such departments and agencies may, however, enter into a memorandum of agreement with a local government unit (LGU): Provided, That the LGU possesses the capacity to implement and maintain the same after construction.
4.2. No project shall be approved for implementation under the CURES Fund unless the proponent can demonstrate that actual work on the same can realistically commence within a period of ninety (90) working-days from the release of the Special Allotment Release Order (SARO) from the Department of Budget and Management.

4. 3. In the construction of local infrastructure projects under the CURES Fund, the projects must be included and proposed under the local development plans of the LGUs and the manpower needed in the project shall be sourced out from the local labor to generate local employment.

The internal revenue allotments (IRA) of LGUs shall be considered in the CURES fund for equitable resource allocation.

SEC. 5. Project Classes. – Infrastructure projects to be funded under this Act shall primarily be for construction, repair or improvement purposes and other related activities but may also include the procurement of the necessary and essential equipment and implements for the operation of the same. No money shall be paid out of this fund for the payment of personnel services, job order salaries, professional and consultancy fees and conduct of trainings, seminars, sports and cultural activities of the LGUs where the projects are located. The priority projects are classified under the following:

5.1. Health-Related Projects to be funded through the CURES Fund which shall be aligned with the Philippine Health Facility Development Plan for...
a more rational allocation of government resources, shall prioritize the following:

(a) Construction, improvement or expansion of national and regional hospitals or the procurement of start-up equipment and supplies for new or existing facilities under this class;

(b) Construction, improvement or expansion of barangay or municipal health centers, or the procurement of start-up equipment and supplies for new or existing facilities under this class;

(c) Construction, improvement or expansion of municipal or city health clinics, hospitals and other facilities or the procurement of start-up equipment and supplies for new or existing facilities under this class;

(d) Construction, improvement or expansion of provincial and district hospitals and municipal health facilities and the procurement of equipment and supplies for new or existing facilities under this class;

(e) Construction of testing centers and isolation facilities for communicable diseases and additional intensive care units at local hospitals;

(f) Purchase of information and communication technology equipment or laboratory facilities to enable immediate coordinated health response to suppress transmission of contagious or communicable diseases, information exchange, and contact tracing;
(g) Construction or establishment of hospitals and clinics with a senior
citizen and persons with disability (PWD) wings, or senior citizen and
PWD health centers;

(h) Improvements that contribute to the suppression, mitigation and risk
management of communicable disease occurrence of public health
concern and its consequences, with special focus on laboratory testing,
contact tracing, telehealth services and electronic medical or health
records system (EMR/HER);

(i) Purchase of equipment to upgrade hospital records into an electronic
health record system;

(j) Infrastructure investment for telehealth services, e-prescriptions and
mobile or remote access to health records;

(k) Purchase of cloud-based platforms for clinical data analysis,
management and consolidation; and

(l) Construction of wastewater or sewage treatment plants or disposal
facilities to minimize chemical and microbial hazards associated in human
and hospital waste.

5.2. Education-Related Projects to be funded through the CURES Fund
shall prioritize the following:

(a) Construction, expansion or improvement of school buildings and
classrooms to decongest school facilities;
(b) Construction, repair or improvement of washing and sanitation areas, toilets in every school;
(c) Construction, repair or improvement of other school facilities for industrial arts, culinary services, libraries, covered courts and other facilities;
(d) Construction, repair or improvement of alternative learning centers, including electronic learning system classrooms and the procurement of equipment and supplies for the operations of facilities under this class;
(e) Construction, repair or improvement of youth civic centers, gymnasium and sports or athletic facilities;
(f) Construction, improvement or expansion of technical-vocational learning centers and the procurement of equipment and supplies for the operation of facilities under this class; and
(g) Establishment of digital infrastructure such as information and communication technology facilities, information and communication technology hubs in any public educational, training, or learning institution and the procurement of equipment and supplies that will facilitate electronic learning, or remote or distance learning in the localities.

5.3. Agriculture-Related Projects to be funded through the CURES Fund shall prioritize the following:

(a) Construction, repair or improvement of municipal, provincial fish ports or docks with ample space that may support social distancing for
direct buyers, and their connecting roads or access networks and other
necessary buildings or attached facilities or equipment for use therein;
(b) Construction, repair or improvement of post-harvest facilities
including cold storage facilities, fish landing for aqua-fisheries, meat
processing and packaging centers for commercial distribution, and the
procurement of farming machinery or equipment and fishery equipment
such as motorized fishing vessels, gill nets, and other facilities for
activities under this class;
(c) Construction, repair or maintenance of municipal, and provincial
livestock facilities, hatcheries, fish nurseries, and other aqua-fishery
facilities;
(d) Construction, repair or improvement of barangay, municipal, city or
provincial trading (bagsakan) centers, food terminals, or satellite markets
following a plan that allows social distancing;
(e) Construction, repair or improvement of municipal, city, and provincial
abattoirs and hazard free packaging facilities;
(f) Construction, repair or improvement of barangay, municipal, and
provincial agricultural training centers, nurseries, and other agri-fishery
research and development facilities;
(g) Construction, repair or improvement of drainage and irrigation
systems for flood-prone agricultural areas;
(h) Construction or acquisition of more modern fishing vessels for cooperatives and fabrication of more fishnets, and other agri-fishery implements; and

(i) Construction of alternative livelihood facilities for agricultural workers that involve processing of economically significant agri-business output.

(j) Establishment of IT-enabled farmers training centers well equipped with high-speed internet and latest computers to advance farming techniques and provide assistance on online selling as well as financial literacy by means of digital payments;

5. 4. Local Roads Infrastructure Projects to be funded through the CURES Fund shall prioritize the following:

(a) Construction or expansion of farm-to-market roads with adjoining solar drying pavements to facilitate transport of goods and supplies;

(b) Construction, improvement or expansion of provincial, city, municipal or barangay roads affecting vulnerable communities;

(c) Construction, improvement or expansion of provincial, city, municipal or barangay roads and other road networks connecting schools, state universities and colleges and government-operated community colleges;

(d) Construction, repair or improvement of provincial, city, municipal or barangay roads connecting communities to health facilities such as hospitals, testing centers, quarantine and isolation facilities;
(e) Construction of provincial, city, municipal or barangay new road openings and construction of bridges across creeks or irrigation canals;

(f) Construction of women and children-friendly evacuation centers and disasters emergency facilities including the establishment of resource development and crisis assistance centers for women and children; and,

(g) Construction, expansion or improvement of roads, pedestrian lanes in provinces outside the National Capital Region (NCR) that have tourist facilities, beach areas or mountain parks, and roads going to new business districts, new economic zones or micro small and medium enterprise business hubs.

5.5. Livelihood Projects to be funded through the CURES Fund shall prioritize the following:

(a) The Implementation of an Enhanced Sustainable Livelihood Program under the Department of Social Welfare and Development (DSWD);

(b) The implementation of an Enhanced TUPAD Program under Department of Labor and Employment (DOLE);

(c) The implementation of the proposed Barangay Emergency Employment Program (BEEP) under DOLE to generate employment and mitigate unemployment due to COVID-19 and ensure income for formal and informal sectors during the post-COVID-19 recovery stage;

(d) The establishment of access to credit and financing for small and medium enterprises (SMEs);
(e) The establishment of research and development (R&D) programs for product development and enterprise diversification;

(f) Building or construction of integrated agricultural processing facilities for high-value agricultural products;

(g) The building or construction of production hubs and local livelihood product marketing and trading centers to improve trade linkages and partnerships; and,

(h) The enhancement of human resource capacity such as technical vocational training and education and the construction of training centers and knowledge transfer facilities.

5.6. Information Technology and Connectivity Projects to be funded through the CURES Fund shall prioritize the following:

(a) Establishment of research and information centers, with digital platforms, for public use and training for the youth and students;

b) Purchase and deployment of mobile network POPs (Telecommunications Point of Presence), parked in selected Municipal Hall in each province that is capable to expand the coverage of the cell site on each province. This telecommunication infrastructure has an approximate 50-100KM radius which improves and extends internet connectivity without putting a new tower;
c) Strengthening of the offices involved in information and communications technology towards the acceleration of the digitalization in the locality;

d) The development, establishment and implementation of digital platforms in doing government transactions;

e) Improving government processes towards paperless communications;

f) Encouraging the private sector towards the digitization of processes including cashless transactions;

g) Appropriation of targeted multi-year investments in information technology infrastructure or equipment including purchase of information and communication technology equipment or laboratory facilities to enable immediate coordinated health response to suppress transmission of contagious or communicable diseases, information exchange and contact tracing; and,

(h) Substantial investments on infrastructure, equipment or systems to ensure adequate and sustainable connectivity, security and nationwide coverage to serve as a crucial backbone for the digital transformation in the health system and secure interoperable information and communication technology solutions that will protect both the patients and providers, and will not disrupt the health system.

5.7. Tourism Industry Projects to be funded through the CURES Fund shall prioritize the following:
(a) Support for programs, projects, and activities to boost domestic
tourism when travel permits post Covid 19;
b) Creation of an Inter-Agency Committee composed of the Department
of Tourism (DOT), the Department of the Interior and Local Government
(DILG), the Department of Environment and Natural Resources (DENR),
and the Department of Public Works and Highways (DPWH) to
implement measures to prepare, improve and enhance nature-based
destinations compliant with global international standards;
c) Formulation by the DOT and the Department of Health manuals
establishing new safety protocols and practices for implementation by all
stakeholders involved in the tourism industry including conduct of
tourism-related activities such as festivals, fiestas, concerts and the like;
d) Construction, repair or improvement of roads, bridges and other
infrastructure leading to identified tourism destinations;
e) Construction, repair or maintenance of medical clinics at major tourist
destinations as well as the supply of the necessary instruments for
adequate response to emergencies;
f) Construction and maintenance of rest rooms, washing and sanitation
facilities including the installation of sanitation devices in parks and
common areas in public tourism destinations;
g) Construction, improvement or maintenance of wastewater treatment
and solid waste management facilities in identified tourism destinations;
h) Ensuring compliance by tourism stakeholders with international environmental standards;

i) Establishment and operation of tourist assistance centers for the security and safety of tourists;

j) Establishment and development of information and communication technology systems and digital facilities for on-line tourism transactions such as ticketing, booking, travel itineraries;

k) Development of sustainable tourism practices such as accommodation, transportation and waste management;

l) Conduct of re-training, capacity development, and improvement of skills for all involved in the tourism enterprises, tourism front liners and workers, particularly on the “new normal” standards and practices of the tourism industry;

m) Re-skilling and upskilling of all involved in the tourism industry to develop new tourism products and meaningful experiences such as bicycle tours, tree planting, and the like; and,

n) Promotion of agriculture, farm and medical tourism areas.

SEC. 6. CURES Fund Executive Cluster Committee. — An Executive Cluster Committee is hereby established to formulate guidelines in the administration of the CURES Fund and designation of the Executive Department or Agencies that shall Receive Applications, Screen and Vet and Process for Implementation of the projects authorized under this Act.
6.1. The Executive Cluster Committee is composed of the following:

Chairperson - Secretary of the Presidential Adviser for Flagship Programs and Projects

Vice-Chairs - Secretary of Public Works and Highways

Members - Secretary of Finance

Secretary of Health

Secretary of Education

Secretary of Labor and Employment

Secretary of Agriculture

Secretary of Trade and Industry

Secretary of Interior and Local Government

Secretariat - Director-General of the National Economic Development Authority

6.2. Duties and Responsibilities of the Executive Cluster Committee:

(a) Within fifteen (15) days from the approval of this Act, the CURES Fund Executive Cluster Committee shall convene to formulate the implementing rules and regulations (IRR) of this Act, which include the standard formula calculating the multiplier effect of the infrastructure project to be implemented considering its effects on local employment and job creation as one of the primary screening factor in project selection and approval;
(b) The Executive Cluster Committee shall establish and maintain an Open and Publicly Accessible Online Portal through which projects funded out of this Act may be monitored;

c) The Executive Cluster Committee shall, pursuant to the eligibility criteria established in this Act and further specified in the subsequent IRR and using the formula adopted, approve priority areas for funding consideration, including the projects which may be implemented therein based on the most advantageous to local employment and job creation as determined by the adopted formula;

(d) Provide adequate mechanisms and measures for social distancing and use of personal protective equipment in the operations of approved projects for CURES to ensure that COVID-19 are contained in the process of giving alternative employment; and

e) The budgetary requirements for the implementation of approved projects under the CURES Fund shall be automatically downloaded to the accounts of the implementing departments or agencies with the implementation and use of the same, subject to existing government audit rules and regulations.

SEC. 7. Reporting Requirement. — The Executive Cluster Committee shall periodically compile all the reports of the implementing department and agencies including the projects implemented by or through LGUs and shall submit within twenty five (25) days at the end of every semester, a status report of the projects to the office of the President of the Republic of the Philippines
and to the Congress of the Philippines through the office of the Senate President and the Speaker of the House of Representatives.

SEC. 8. **Joint Congressional Oversight Committee.** – A joint oversight committee is hereby created to oversee, monitor, and evaluate the implementation of this Act. The joint oversight committee is composed of three (3) members from the House of Representatives to be appointed by the Speaker of the House and three (3) members from the Senate, to be appointed by the Senate President.

SEC. 9. **Separability Clause.** – If any provision of this Act is declared unconstitutional, the remaining parts or provisions not affected thereby shall remain in full force and effect.

SEC. 10. **Repealing Clause.** – All law, decrees, orders, rules and regulations or parts thereof, which are inconsistent with the provisions of this Act is hereby repealed, modified, or amended accordingly.

SEC. 11. **Effectivity Clause.** – This Act shall take effect fifteen (15) days after its publication in the *Official Gazette* or in two (2) newspapers of general circulation.

Approved,
