

REPUBLIC OF THE PHILIPPINES
HOUSE OF REPRESENTATIVES
Quezon City

EIGHTEENTH CONGRESS
First Regular Session

House Bill No. 1657

Introduced by **MAGDALO Party-List Representative**
HON. MANUEL DG. CABOCHAN III

EXPLANATORY NOTE

In spite of the Philippines' high adult literacy rate and regard for education, the quality of the country's education system is in decline. Many Filipino children from poor families are still forced to drop out from schools. Instead of completing high school and pursuing higher education, these children are often employed in manual and very basic tasks to help support their family.

Ultimately, the situation causes these children to grow up with just elementary education. As a result, the country is suffering from an inability to produce a competent and skilled workforce - to be employed both at home and abroad - required for badly needed socioeconomic development.

The bill seeks to address this situation with the creation of Science High Schools in each province and highly urbanized city. It is hoped that these additional schools will be able to continue the good work of this country's existing national Science High Schools in producing competitive graduates especially in the field of research and Mathematics. These new schools will be subsidized by both the national government through the Department of Education and the concerned Local Government Units, giving children from poorer backgrounds the chance to a better education and a better life.

In view of the foregoing, approval of this bill is earnestly sought.
