

REPUBLIC OF THE PHILIPPINES
HOUSE OF REPRESENTATIVES
Quezon City

EIGHTEENTH CONGRESS
First Regular Session

House Bill No. 1953

Introduced by **MAGDALO Party-List Representative**
HON. MANUEL DG. CABOCHAN III

EXPLANATORY NOTE

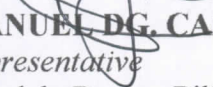

Many of the dental diseases are considered as public health problems in developing countries. In the Philippines, such problems, exacerbated by the lack of proper dental health practices of the general population, have become serious national concerns.

The ubiquitous effects of the magnitude of the dental problem can be translated in economic terms. Every tooth affected means two (2) days loss of productivity, lost opportunities, recurring pain and severe discomfort as well as increased cost of dental treatments.

This bill seeks to create a position of rural dentist in every rural health unit to avert the loss in economic productivity of our people and to alleviate the discomfort felt by those afflicted with such diseases. Considering that there are six hundred fifty-two (652) rural health dentists in the plantilla of the Department of Health distributed in the twelve (12) regions, the creation of one (1) dentist position in each of the 1,991 rural health units under the Department of Health, the priority targets of dental health services - pre-school children, school children, pregnant and non-pregnant mothers and other adults - will be adequately served. With these positions, the ratio of dentist to the population will approach the standard ratio of 1:20,000 population, similar to that of physicians.

While it will have additional costs, the benefits to be derived from these services will be tremendous. An addition of 8,034,000 children, mothers and adults can be properly attended to.

In view of the foregoing, the passage of this bill is earnestly sought.
